Contact No.: 8688950183

Professional Summary:

Skilled **DevOps Engineer** with **4+ years** of hands-on experience supporting, automating, and optimizing mission-critical deployments in **Azure & AWS**, leveraging configuration management, CI/CD, and DevOps processes. Configuration management using Terraform, Bit Bucket Multi Cloud, Kubernetes.

- High expertise in software configuration management and software and release engineering
- Proficient with various development, testing, and deployment tools
Git, Jenkins, Ansible, Nagios, Docker, Basic in Python,
- Expertise in containerization technologies like Docker and
Orchestration tools such as Kubernetes.
- AWS Services (EC2, Cloud Watch, VPC, SQS, SNS, IAM, S3, R53)
- AZURE Services (VM, Storage Account, AKS, Database pass..)
- Good knowledge on Branching structure, creating and merging branches and
applying branch Policies.
- Strong understanding of cloud architecture, infrastructure as code, and
automation tools.
- Working experience on operating systems like Windows, Linux, etc.
- Created and maintained robust Azure DevOps & Jenkins CI/CD pipelines for automated
testing, integration, and deployment, enhancing delivery efficiency and reliability.
- Implemented automated testing and quality assurance by implementing
SonarQube in the pipeline.

Technical Skills:

Operating System	Linux Distros, Windows
Cloud	AWS, Azure
IAC	Terraform
Microservices	Kubernetes
Container Platform	Docker
Management Tools	Confluence, PagerDuty
Ticket Tool	JIRA
Source Code Management Tool	Bitbucket, Github.
CICD	Github Actions, Jenkins, CodeBuild
CDN	Cloudflare, Cloudfront
Monitoring	CloudWatch, NewRelic
Database	MySQL
Other Tools	1Password, VS Code, Postman, Jmeter

Academic Details:

Completed Graduation in Bachelor of Computer Applications in Krishna Chaitanya Degree College (Nellore)

Work Experience:

DevOps Engineer, The Modern Data Company
Project: Mind24/7

Nov 2022-July 2024

- Managing the Cloud Infra(azure)
- Utilized Terraform extensively, leveraging modules and the latest features to streamline infrastructure management.
- Implemented scalable and manageable Kubernetes clusters in large-scale systems, optimizing performance and reliability.
- maintaining bit-bucket repo (code maintenance, pipelines)
- Identifying bugs in product code and reporting to engineering team
- responsible for version release testing of the product
- managing alert mechanism of the client environment
- Upgrading client environment with new versions and builds
- Part of the product delivery team client facing
- responsible for client data migration from on prem to cloud
- Responsible for user access management level
- Collaborated closely with customers to implement solution/product deployments, ensuring client satisfaction and alignment with business goals.

Enivornment: Terraform, Azure, Kubernetes, Windows Family , Linux, CI/CD, Jenkins, Apache Tomcat , Git and GitHub, Ansible, Nagios, Cloud Watch , AWS,AZURE, GCP, Docker

Devops Engineer, Wipro
Project: Caterpillar

May 2021 –May 2022

- Implemented Continuous Integration using Jenkins and **GIT**.
- Configured Git to inform all the teams about the latest changes to avoid conflicts due to the push before pull issue.
- Managing Continuous Integration and Continuous Delivery (**CI/CD**) using Jenkins and release management using Nexus
- Maintaining Regular Backups of the Logs.
- Responsible for maintaining Multiple DevOps tools configuring across all projects **GIT, Jenkins, MAVEN**
- Creating Branches, Tags and maintaining the version across the environments using GIT.
- Creating Cloud Watch alerts for instances and utilizing them in Auto-scaling launch configurations.
- Setup of Jenkins for continuous integration builds process by configuring git.
- Used **Docker** for virtualization, Run and Deploy the applications.
- Evaluated Composers for **Docker container** orchestration.
- Experience with building containerized applications using **Docker image**

- Management and design of integrated build pipelines using continuous integration workflows such as Jira, **Git, Jenkins, Docker, and Nexus**.
- Experience with Jenkins for continuous build management, during scheduled Releases.
- Basic knowledge of **Kubernetes** .

Enivornment: Aws, Jenkins, GIT, Docker, Maven, Terraform, Terraform, Azure, Kubernetes, Windows Family , Linux, CI/CD, Jenkins, Apache Tomcat , Git and GitHub, Ansible, Nagios, Cloud Watch , AWS, AZURE, GCP

Software Engineer, NexGen Technologies
Project: Hospira Healthcare

Apr 2020 –May 2021

- Installing and configuring GIT, Jenkins, Deployment and automation.
- Release Engineer for a team that involved different development teams and multiple simultaneous software releases.
- Developed and implemented Software Release Management strategies for various applications according to the agile process.
- Identity root cause and resolve problems.
- Maintaining the source code in GIT for various applications.
- Administered merge, build and deployment of the codes to all the environments.
- Responsible for creating the branches in the code.
- To configure and maintain codebase to support the build and deployment of code on servers.
- Supporting the developers in configuration management environment.
- Responsible for the Plug-in Management, User Management, Build/Deploy Pipeline Setup and End to End Job Setup of all the projects.
- Jenkins is used as a Continuous Integration tool for automation of daily process.
- Involved in the release process and deployed applications (WAR) to the Tomcat.

Enivornment: Aws, Jenkins, GIT, Docker, Maven, Terraform, Terraform, Azure, Kubernetes, Windows Family , Linux, CI/CD, Jenkins, Apache Tomcat , Git and GitHub, Ansible, Nagios, Cloud Watch , AWS, AZURE, GCP
