Projects Working Experience :

Project Name: Process Automation Tool – Laravel

Tech.: Laravel, Livewire, Vue.js and MySQL

Team Size : 4

Description:

- ✓ Used for Laravel, Livewire, Vue.js and MySQL
- ✓ Process Automation Tool is a cloud-based low-code platform that serves as a powerful tool for building and deploying custom business applications without the need for extensive coding knowledge.
- ✓ The primary purpose of Process Automation Tool is to enable businesses, organizations, and individuals to create, automate, and manage applications tailored to their specific needs

Key purposes and benefits of Process Automation Tool:

Rapid Application Development: It allows users to build applications quickly using a visual, drag-and-drop interface. This rapid development approach saves time and resources, enabling businesses to address their unique challenges promptly.

Customization: The platform offers extensive customization options, allowing users to tailor applications to their specific requirements. From data fields and forms to workflows and automation, This Application provides flexibility to create applications that align perfectly with business processes.

Process Automation: Users can automate repetitive tasks and workflows, reducing manual effort and minimizing the risk of errors. Automation boosts efficiency and productivity by streamlining processes and ensuring timely actions.

Project Name: T Connect (PMS) – Project Management System

Tech.: LARAVEL, PHP, MySQL, AJAX, JSON

URL: <https://pms.eteamconnect.com/>

Team Size : 2

Description:

The “**Project Management System**” addresses the management of software projects. It provides the framework for organizing and managing resources in such a way that these resources deliver all the work required to complete a project within defined scope, time and cost constraints. The system applies only to the management of projects and is a tool that facilitates decision making.

Project Name: T Connect (DMS) – Document Management System

Tech.: LARAVEL, PHP, MySQL, AJAX, JSON

URL: <https://dms.eteamconnect.com/>

Team Size : 2

Description:

The “**Document Management System**” addresses the management of software projects. designed to store, manage, and track all documents and data that passes.

WordPress Projects:

- Extensive knowledge and experience of building WordPress CMS websites using the best practice & de-facto standard plugins. Knowledge of existing inbuilt WordPress functions.
- Creation of custom post types, plugins/widgets written to conform with the WordPress coding standards.
- Creation of clean, logical, well-documented and re-usable code. Theme/Template integration. Knowledge of WordPress Network (Multisite) beneficial.

Shopping Cart Projects:

- Our Shopping Cart program allows visitors to your on-line shopping site to collect items in a virtual shopping cart over multiple product web pages without losing the items ordered. Our cart keeps track of what the shopper has ordered with a SID (Shopper I.D).
- **Tools Used :** PHP, Mysql, Ajax, JQuery
- **Opensource Used:** Opencart, Prestashop
