Projects

Exponential E – MAP :

Role : Software Engineer.

Technology : React JS, Storybook, Jest, Enzyme.

Description: A Maturity Assessment Platform , considering the various key challenges an organisation faces when it comes to achieving their digital goals and successfully implementing their latest technologies.

Accelerator – React JS :

Role : Software Engineer

Technology : React JS, Storybook, Jest, Enzyme.

Description: A head start for the React application with TypeScript. Created a library to give full control, enabling us to address

enabling us to address contextual commerce scenarios without starting from scratch.

GRT ORIANA – JSS Separation:

Client : GRT Jewellers

Role : Senior Software Engineer

Technology : React using Typescript.

Description: From the whole GRT website we have separated the Jewel Saving Scheme (JSS) feature as a separate service. Where JSS related pages, functionalities, data, background jobs (CRON's), notifications are separated as micro services which work individually.

JSS related pages are designed and developed using ReactJS which is fast and efficient to process

GRT-Digigold:

Client : GRT Jewellers

Role : Senior Engineer.

Technology : React using Typescript

Implemented **Frontend** for digital gold management in GRT, pricing calculations, compliance checks, and other core functionalities. Developed

buy,sell,checkout,transfer,payment, redemption forms using React typescript components which handles the user interface, user interactions, and data presentation.
