SUMMARY

A Pioneering and security-oriented developer offering 9 years' experience in designing, implementing, integrating, testing, and supporting impactful applications developed in diverse, collaborative environments for iPhone and iPad devices on the native platform. Also having experience in cross platform application development using Ionic & Flutter.

SKILLS

Swift Objective - C RxSwift SwiftUI

Dart HTML5 CSS3 Angular

CoreData BLE Augmented Reality

Autolayout MapKit HealthKit

MVC MVVM VIPER MVP

REST APIs JSON Alamofire

App analytics: Firebase & Mixpanel

Xcode CocoaPods S.O.L.I.D

XCTest JIRA Figma

Git Agile

Payment Gateway: PayPal, Stripe, Paytm

In-app purchases Push notification

App Store submission and review process

Adaptability Teamwork

PROJETS

My Riwal

<https://apps.apple.com/app/my-riwal/id1595448220>

- **Role:** Lead Developer
- **Responsibilities:** collaborate with product owner and team to create a user centric application. Included developing app from scratch and including UI design and integrating with api. Implemented various UI flows and business logic. Resolving technical and design issues and performing independent unit testing
- **Technologies:** iOS, RxSwift, Swift, MVVM, Mixpanel , REST API, AR, BLE, Push notification.

My Manlift

<https://apps.apple.com/app/my-manlift/id1595453323>

- **Role:** Lead Developer
- **Responsibilities:** collaborate with product owner and team to create a user centric application. Included developing app from scratch and integrating with api. Implemented different UI flows and business logic. Implemented new flows. Resolving technical and design issues and performing independent unit testing
- **Technologies:** iOS, RxSwift, Swift, MVVM, Firebase, REST API, BLE, FCM, XCTest.

TireValue

- **Role:** Lead Developer
- **Responsibilities:** collaborate with product owner and team to create a user centric application. Implemented different UI flows and business logic. Implemented new flows. Re-write app on new code base. Resolving technical and design issues and performing independent unit testing
- **Technologies:** Ionic 5, Angular, HTML, CSS

ProTool

<https://apps.apple.com/us/app/protools/id1581864471>

https://play.google.com/store/apps/details?id=com.weilmclain.techtool&hl=en_US&gl=US

- **Role:** Software Developer
- **Responsibilities:** collaborate with product owner and team to create a user centric application. Implemented different UI flows and business logic. Implemented new flows. Re-write app on new code base. Resolving technical and design issues and performing independent unit testing
- **Technologies:** Ionic 5, Angular, HTML, CSS

MRT Mobile Solutions

<https://apps.apple.com/us/app/mrt-mobile-solutions/id1207929087>

- **Role:** Lead Developer
- **Responsibilities:** collaborate with product owner and team to create a user centric application. Implemented different UI flows and business logic. Implemented new features. Resolving technical and design issues and performing independent unit testing
- **Technologies:** iOS, Swift, MVVM, CoreData, Firebase, REST API, FCM, GoogleMap.

Passenger & LT

<https://apps.apple.com/us/app/passenger-lt/id1142645964>

- **Role:** Lead Developer
- **Responsibilities:** collaborate with product owner and team to create a user centric application. Implemented different UI flows and business logic. Implemented new features. Resolving technical and design issues and performing independent unit testing
- **Technologies:** iOS, Swift, MVVM, Firebase, REST API, FCM.

Happy Visitor

<https://itunes.apple.com/in/app/happy-visitor/id1438099951?mt=8>

- **Role:** Lead Developer
- **Responsibilities:** collaborate with product owner and team to create a user centric application. Implemented different UI flows and business logic. Implemented new flows. Resolving technical and design issues and performing independent unit testing
- **Technologies:** iOS, Swift, MVVM, Firebase, REST API, FCM, XCTest.

Fast & UP

<https://apps.apple.com/in/app/fast-up/id1494879319>

- **Role:** Lead Developer
- **Responsibilities:** collaborate with product owner and team to create a user centric application. Included developing app from scratch and integrating with api. Implemented different UI flows and business logic. Implemented new flows and features. Resolving technical and design issues and performing independent unit testing
- **Technologies:** iOS, Swift, MVVM, Firebase, REST API, Push notification, payment gateway.

Emergency Q

<https://itunes.apple.com/nz/app/emergency-q/id1122976816?mt=8>

- **Role:** Lead Developer
- **Responsibilities:** collaborate with product owner and team to create a user centric application. Included developing app from scratch and integrating with api. Implemented different UI flows and business logic. Implemented new features. Resolving technical and design issues and performing independent unit testing
- **Technologies:** iOS, Swift, MVVM, Firebase, Push notification, Google Map, BLE, HealthKit, Beacon.

OBR Volunteers

<https://itunes.apple.com/us/app/obr-volunteers/id1193200138?mt=8>

- **Role:** Software Developer
- **Responsibilities:** Implemented different UI flows and business logic. Included developing app from scratch and integrating with api. Implemented new functionalities. Resolving technical and design issues and performing independent unit testing
- **Technologies:** iOS, Swift, Firebase, REST API, Push notification, Google Map, CoreData.

BorKnow

🔗 <https://itunes.apple.com/us/app/borknow-learn-bengali-alphabet/id1188187112?mt=8>

- **Role:** Software Developer
- **Responsibilities:** Implemented many different UI flows and business logic. Developed app from scratch. Resolving technical and design issues and performing independent unit testing
- **Technologies:** iOS, Swift, Firebase, CoreData.
