Hyderabad , Telangana.

ABOUT ME

Detail-oriented and experienced RPA Developer with over 3 years of experience in designing, developing, and implementing automation solutions. Proficient in leading RPA tools such as UiPath, Automation Anywhere. Seeking to leverage my expertise in automating complex business processes to contribute to the growth and efficiency of the organization.

EDUCATION

Bachelor of technology

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY , Hyderabad, Telangana
(2017 - 2021)

81%

SKILLS

- RPA Tools: UiPath
- Programming Languages: Python, C#, VB.NET
- API Integration: POSTMAN
- Version Control: Bit Bucket(Stash)
- Project Management: Agile, Scrum, Waterfall methodologies
- Excellent problem-solving skills and the ability to troubleshoot complex technical issues.
- Strong analytical skills and attention to detail.
- Ability to work independently and as part of a team in a fast-paced environment.
- Strong communication skills, both written and verbal.

REWARDS & RECOGNITION

- Rewarded with TCS Gems for best employee nomination
- Awarded as Best Debut in GHX Xemplary awards.

INTERESTS

Travelling and Fitness

PROFESSIONAL SUMMARY

- As an RPA Developer with expertise utilizing UiPath to design, develop, and implement automation workflows that optimize business processes and reduce manual effort.
- having good understanding and hands-on on OCR Implementation, Computer Vision
- have experience in support and maintenance of production robots
- Analyze and Design solutions in accordance with design principles and create a Design document(SDD) and Test cases as per RPA recommendation
- Can be able to work independently end to end, right from automation feasibility, Design, coding, testing and deployment on automating the Process in the Automation Tool
- having handful experience in Development and Coding of RPA process as per the requirements using RPA (UiPath)
- Solve issues that arise in day-to-day running of RPA processes and provide timely support and solutions as required
- Supported the operational teams during the UAT and Production rollout phase
- Having good verbal & written communication skills, and can able to talk directly/independently with clients to understand the requirements and provide a solution
- Implemented AI and machine learning capabilities using Amazon Textract with Python to enhance automation processes, particularly in areas like data extraction and document processing.
- Continuously analyzed existing automation solutions to identify areas for improvement and implement best practices. Worked closely with other developers, business analysts, and stakeholders to ensure the successful implementation of automation projects.
- Communicate effectively with technical and non-technical stakeholders, providing clear updates on project progress, challenges, and solutions.
- Having experience in Mentoring and guiding junior team members, fostering a collaborative and innovative work environment.
- Adaptable to learn and work on new technologies.

WORK EXPERIENCE

1. Company Name | TATA Consultancy services, Hyderabad.

Dec 2021- Dec 2023

RPA Developer

- As an RPA Developer, I have successfully implemented end-to-end automation solutions, encompassing analysis, design, development, testing, and deployment. I have developed robotic bots using UiPath to automate manual, repetitive, rule-based, and high-volume processes across various domains.
- My work has involved automating desktop applications like Excel, Word, Outlook, SAP, and web-based processes.
- Designed and developed UiPath bots to automate day-to-day activities, including Excel report management, SAP data updates, and web automation.
- Utilized core workflow principles to create efficient, well-structured, and easy-to-understand automation processes.
- Automated report checking and data updates from SAP to Excel based on client templates, ensuring accurate data synchronization.
- Developed bots to automate candidate resume shortlisting based on job descriptions, improving recruitment efficiency.
- Automated daily status checks, chemical component verifications, and concentration validations using UiPath and C#, ensuring data accuracy in SAP.
- Prioritized and executed the strategic roll-out of RPA solutions, collaborating with test teams during product testing and UAT phases to resolve issues.
- Used UiPath Orchestrator for deployment, monitoring, and maintaining bots, ensuring smooth operation and minimal downtime.
- Worked on automation solutions with desktop applications (Excel, Word, Outlook, SAP) and web platforms, enhancing operational efficiency.

2. Company Name | Global Healthcare Exchange, Hyderabad

Dec 2023 - Till date

RPA Developer

- Utilized Python and Amazon Textract to automate data extraction from PDFs, leading to substantial cost savings for the organization.
- Developed and implemented UiPath bots for email correlation and purchase order acknowledgment, automating critical business processes.
- Proposed and implemented enhancements to optimize bot performance, improving efficiency in pre-existing production bots.
- Conducted unit testing and provided pre-UAT and post-UAT support, ensuring the reliability and accuracy of automation solutions.
- Developed and delivered a Purchase Order Acknowledgment (POA) process that directly impacted business cost savings, and for that rewarded as the "Best Debut Award" within six months of joining the organization.
- Created a Kibana dashboard to visualize cost savings by transaction, enhancing business understanding and decision-making.
- Initiated, developed, and delivered an HR automation process for shortlisting candidates and processing salaries, streamlining HR operations.
- Collaborated closely with cross-functional teams to ensure the successful delivery of automation projects, fostering a collaborative and efficient work environment.
- Create detailed documentation for each automation process, including design specifications, test cases, and user manuals.
- Maintain documentation for future reference and knowledge sharing within the team.
- Deploy RPA solutions into production environments and monitor their performance.
- Provide ongoing support and maintenance to ensure the automation processes remain functional and efficient.
- Continuously identify opportunities for process improvement and recommend automation solutions.
- Train end-users and other stakeholders on how to use and manage automated processes.
- Provide technical support and guidance to resolve any issues related to RPA implementations.
