Summary:

- Around 16+ years of total IT industry experience on **Oracle Apps DBA, DBA, Fusion SaaS Middleware Applications** and **SRE** roles.
- Experience in triaging, monitoring and maintaining of containerized applications deployed on **K8S**.
- Experience in administering, Patching, monitoring of **Exadata** Databases and **Storage Servers**(Cell Servers)
- Exposure in databases migration to OCI-cloud Exadata of noncdb to **CDB** from on-premises.
- Exposure in triaging and optimizing the performance issues raised at **Exadata, ASM** and **RAC** environments.
- Experience in converting non-RAC databases to RAC databases.
- Exposure in performing day2day activities on AWS RDS **PostgreSQL** database.
- Exposure on DevOps tools **GIT CI/CD, Docker, Jenkins**.
- Implemented and monitoring of Standby/DR on various database versions.
- Involved yearly DR switchover testing process.
- Exposure in addressing the SQL performance issues by analyzing **AWR, ASH,SQLT** and **Hanganalyzer**.
- Working on both **Pro-active** and **Re-active** SR's using multiple monitoring tools like **OMC, Grafana, OEM, RUEI, JobControl**.
- Experience in generating and analyzing **Heap Dumps, Thread Dumps** and **jfr's** for finding the root cause for slowness.
- Experience in Oracle Applications **11i,R12 and R12.2** Installations, configuration, Cloning, Security, Patching, Upgrades, Maintenance using AD and other utilities.
- Implemented **iReceivable, iSupport** and **iStore** modules in **DMZ** with **Reverse Proxy** setup.
- Strong knowledge on **Oracle Cloud Infrastructure** services and Amazon **AWS**.
- Experience in **upgrading the EBS** Applications from **11.5.10.CU2** to **R12**.
- Experience in implementing the **SSO, SSL** with 11i and R12 applications.
- Implemented **shared appltier** application systems (**11i shared appltier**).
- Implemented Oracle Applications **Release12** and 11i (**single and multi node**).
- Implemented **Parallel Concurrent Processing (PCP)** to load balance CP tier.
- Experience in Customizing the **AUTOCONFIG**.
- Implemented Applications DBA workers in **Distributed process** to reduce the downtime.
- Implemented both servlet and socket mode connection configurations on forms tier.
- Applied product specific fix **patches, family packs, and maintenance packs** -- all types of patches –adpatching.
- Experience in **upgrading the database** from **9.2.0.8** to **10.2.0.4 , 11.2.0.3,11.2.0.4,12.10.2**
- Experience in cloning and patching for **10g RAC** and **11g RAC** configuration.
- Well versed with UNIX shell, Python scripting.

Certifications

- **Oracle Cloud Infrastructure 2018 certified Architect Associate.**
- **Python for Data Science**
- **Hadoop Administration Level-1**

Skills:

Operating Systems	Windows, AIX 4.3, Linux, Solaris, Oracle Linux
Languages	SQL, PL/SQL, JAVA2, C
Tools	PL/SQL Developer, Jdeveloper, TOAD, OEM, OAM, SQL*Plus, SQL*Net, SQL*Loader, Import/Export, RMAN, Snow, BugDB , OMC, Grafana , OEM , Jira
RDBMS	Oracle 19c,18c, 12c,11g,10g, 9i, MS-SQL Server
Middleware	WebLogic, WebSphere, 10g AS,9iAS, JBoss,
Web Technologies	Python, PHP, HTML, Java Script, JSP, Servlets, Struts.XML
Infrastructure	Exadata, ExaLogic
Security Management	Oracle Identity Manager, MS Active Directory, Exchange, RSA Authentication Manager.
Applications	OracleFusionApplications Rel8 to R12c, Oracle Applications 11i to R12.2.4(12c)

Experience:

Working with Equinix from Jul 2022 to till date.

Responsibilities

- Creating monitoring dashboards for the applications deployed on Kubernetes.
- Proactively monitoring and addressing the issues/errors raised when calling the Interfaces and API Calls.
- Implemented monitoring alerts for AWS RDS instances.
- Analyzing and resolving the customer raised ServiceNow incidents.
- Identifying the bugs and proactively raising Problem Tickets with DEV team.
- Addressing the PostgreSQL Jira requests for supporting the Domain Creation Process.
- Triaging and troubleshooting the application and database performance issues.
- Actively involved and completed the database optimization projects.

Worked with Oracle India Pvt Ltd from Aug 2021 to Jul 2022.

Responsibilities:

- Proactively identify and addressing the SQL and Applications performance issues.
- Proactively monitoring and troubleshooting the performance issues arising on Fusion SaaS Applications hosted on OPC and OCI.
- Triaging the performance issues using the monitoring tools like OMC, Grafana, OEM and RUEI.
- Raising bugs and closely working with respective module dev team in resolving the performance issues.
- Working on reactive SR's raised by customer in both MOS and Jira.
- TTR reduction by implementing the skills learned from various tools.
- Executing of ECR's (Emergency Change Requests)
- Attending and resolving the TCB (Tech Control Bridge) and MI (Major Incidents)
- Creating RCAs for the issues that I worked on.
- Helping team members in triaging the performance issues wherever needed.

IBM INDIA PVT Ltd from April 2017 to Aug 2021.

Responsibilities:

- Being as SME, Responsible for triaging the performance issues and preparing the RCA's for the Sev-1 raised by the vendor and the customer.
- Implemented the DR setups for the oracle applications running on R12.2.4 and Agile applications.
- Upgraded the Oracle Databases that were running on 11.2.0.4 to 12c.
- Created new EBS Development environments to support the customer-initiated projects.
- Helping team members in fixing the issues that were raised while cloning and patching of EBS applications.
- Responsible for cloning and patching of R12 and AGILE Applications.
- Installing and configuring the 13C OEM and its Agents to monitor multiple databases and application services.

ORACLE INDIA PVT Ltd from Jul 2014 to April 2017.

Responsibilities

- Responsible for triaging the performance issues raised by customers on CRM, HCM and GSI fusion applications hosted on Oracle Cloud.
- Responsible for planning and implementing the heap sizes to avoid the OOM issues.

- Responsible for preparing and setting up the VM's memory as per the latest Fusion Application version (Rel9 to Rel10 and Rel11) before pod goes for an upgrade.
- Responsible for maintaining the cloud infra hosted on EXALOGIC.
- Responsible of increasing the Heap and VM's Resize as per the recommendations.
- Performing scale up's and scale outs of WLS managed servers.
- Responsible for creating AUX VM's and deploying the WLS managed servers to increase the performance.
- Analyzing the slow click url's by generating the JFR's using JRocket Mission Control.
- Analyzing the Heap and Thread dumps using MAT tool
- Analyzing the slow patching issues occurred while upgrading.
- Responsible for increasing the jdbc connection pool size as recommended.

IBM INDIA PVT Ltd from Sep 2010 to Jul 2014

RESPONSIBILITIES

- Responsible for Installing of **R12** and **AGILE PLM** and **SOA** Applications.
- Responsible for upgrading R12 and AGILE Applications and Databases.
- Responsible for cloning and patching of R12 and AGILE Applications.
- Implementing of **SHARED APPLTOP** on 11i and R12.
- Configured external modules in **DMZ** with **Reverse Proxy**.
- Registering of Custom Products in 11i and R12.
- Implemented **DATAGAURD** on 10g and 11g Databases.
- Resolving **sev-1** issues on priority.
- Installing and configuring the **12C OEM** and its Agents to monitor multiple databases and application services.
- Configured new instances and R12 applications on **cloud** servers.

CYMA SYSTEMS INC, From Nov-07 to Aug-2010 Oracle Applications DBA

Project: Maintaining of Oracle Applications R12 and 11.5.10 CU2 with the application Server 9i AS, 10g AS.

Software: Oracle (9i/10g), Oracle Application Object Library (AOL), Window XP, Pro*C, C, Unix Shell Scripting, Perl Scripting, SQL scripting, Forms 6i, 10g and Reports 6i, 10g Unix CRON jobs.

OS: IBM AIX 6, Windows xp, Oracle Enterprise Linux 5.6 x86 64 bit.

Hardware: EMC Drives NX4-480, Sun E2900

RESPONSIBILITIES:

- Responsible for installing Oracle Applications R12/11i in single node & multimode
- Installation, Upgrade and Configuration of Oracle **9.2.0.8 to 10.2.0.4 database.**
- **Upgrading 11.5.10 CU2 Applications to R12.**

- Setup and Configure the **iSupport and iReceivables, iStore** modules for internet access.
- Configured the **shared appl_top with DMZ** configuration for external application access.
- Configure the **Email Center and Workflow**.
- Load Balancing Concurrent Processing tier – **PCP**
- Installing CRS stack and **RAC** Oracle Homes
- Performing Complex **RAC** setup with Shared appl-tier application system
- Applying one-off fixes to Database Oracle Homes (both RAC and non-RAC) using **Opatch utility**
- **Cloning** Oracle Applications instances both R12 and 11i instances
- Applying Rollup **Patches** R12.0.1, R12.0.2, R12.0.3, **ATG RUP5, ATG RUP6**
- Upgrade of individual Oracle Applications product and product families by applying **Mini-Packs and Family Packs**
- **Upgraded Databases from 9i to 10g, 10g to 11g**
- Upgrading 11.5.10 environment to 11.5.10 CU2

Education:

- Master of Science in Computer Science
- Bachelor of Science in Computer Science
