Career Objective

A motivated individual with in-depth knowledge of languages and testing strategies, seeking a position in a growth-oriented company where I can use my skills to the advantage of the company while having the scope to develop my own skills.

Profile Summary

- **4 years** of total experience in **Software Testing, Automation Testing, Manual Testing, API Testing and Python.**
- Hands-on knowledge in Test cases writing, Test plan, Test strategy.
- Hands-on Knowledge gained in Software Design and Software Design Change, Defect Identification and Bug RCA through Splunk tool, Enhancement.
- Well acquainted with all phases of SDLC and STLC and Agile methodology.
- Proficient in JIRA tool for bug creation
- Strong Experience in **Python.**
- Strong Experience in **Backend API testing (Postman).**
- Strong Experience in **Cypress.**
- Strong Experience in **Rest API.**
- Strong Experience in **Selenium WebDriver.**
- Strong Experience in **Splunk tools.**
- Strong Experience in **bit bucket (code repository), GIT bash.**
- Strong Experience in **Database Testing [D Beaver IDE]**
- Strong Experience in **Agile methodology and sprint plan.**
- Strong Experience in **Jira.**
- Hands on Experience in **SQL**
- Strong Experience in **JMeter.**
- Ability to deliver technology trainings and KT to the peers.
- Demonstrated ability to acquire technical knowledge and skills rapidly.
- I would take up assignments with enthusiasm and challenges, playing positive role in the team and ability to interact with individuals at all levels.
- Excellent team member possessing good communication and interpersonal skills.

Technical Skills

- **Operating Systems** : **Windows.**

- **Tools** : Jira
- **Database** : SQL.
- **Project management** : Agile
- **Test Strategies** : BVA, ECP, Regression testing, Sanity testing, Cross browsing testing, mobile testing, UI testing, Performance testing.
- **API testing** : Postman

Educational Details

- **Bachelor in Electrical & Electronics Engineering [B-TECH]** from Jawaharlal Nehru Technological University with aggregate 74%.

Employment History

- Working as a Software Engineer in **Radiuscards Solutions PVT LTD** from April 2023 to till date.
- Worked as Associate Software Engineer in **Tech Mahindra** from December 2021 to April 2023.
- Worked as Associate Software Engineer in **Azzurra Solutions** from October 2020 to December 2021.

Project Details

Module 1 : **Sudoku Solver Project**

Company : **AZZURRA Solutions**

Role : SDET

Team Size : 15

Skills : Python, Manual Testing, API Automation Testing, PY Test, Selenium, SQL.

Description : The main objective of the project is to develop a sudoku game. You need to install PY game in order to start the project. You need to import the PY game module for this project.

Module 2 : **Retail Analytics Dashboard Project (UPSLC)**

Company : **Tech Mahindra**

Role : SDET
Team Size : 10
Skills : Python, Power Bi, API Automation Testing, Manual Testing, Selenium, Cypress, SQL.
Description : This project aims to create an analytics dashboard for retail businesses to analyze sales trends, customer behavior, and store performance.

Module 3 : Connect Pay Banking Domain Project

Company : Radiiuscard Solutions Private Limited

Role : SDET
Team Size : 16
Skills : Python, API Automation Testing, Manual Testing, Selenium Web Driver, SQL.
Description : It is a largest online banking platform which covers all over the world and covers all types of individual and business accounts. IBAN (International bank account number) is the major feature of Connect pay

Where international account number is generated for international Transaction for Transferring Money.

Roles & Responsibilities

- Perform comprehensive Manual Testing to identify bugs, issues, and areas of improvement in the software.
- Design, develop, and maintain automation scripts using selenium to automate test cases, ensuring coverage across different test scenarios.
- Selecting and using the right tool for automation
- Applying various designs and documenting the automation test strategy
- Create detailed, comprehensive, and well-structured test plans and test cases based on requirements.
- Participating in Selenium Environment Setup with an Integrated Development Environment (IDE)
- Automating the design of a framework
- Analyzing and generating test reports
- Involved in identification of test scenarios and test cases for different types of testing like functional, system, integration, and regression testing as per the requirements of the site.
- Keep track of the new requirements in the Project and update the test cases accordingly
- Performed System Testing, Security Testing, GUI Testing, Integration Testing, Functional and Regression Testing, and Security Testing
- Performed Database testing using SQL queries and D Beaver IDE.
- Participated in scrum calls, Product Grooming, Sprint Grooming and Interaction with Client.
- Handling API testing using swagger and Postman sanity for continues deployments in production.
- Analyze test execution results and post defects with detailed steps and screen-shots.
- Managing the testing team in sprint planning and grooming activities.
- Handling client product demos.
- Grooming the junior level resource to make comfortable to the system.
- Participated in project planning and collaborate with stakeholders to define test objectives, scope, and strategies.

- Contributed to the creation of comprehensive test plans that outline the testing approach for different phases of the software development life cycle.
- Developed and implement a test automation strategy based on project requirements.
- Evaluated and select appropriate automation tools and frameworks.
- Written and maintain automated test scripts using selected programming languages and automation tools.
- Monitored and analyze test results, identify and report defects, and collaborate with the development team to resolve issues.
