RPA DEVELOPER

Strategic RPA Developer with 4 years of experience in designing, developing, and implementing robust automation solutions using UiPath and Kofax RPA. Proficient in analyzing business processes, identifying automation opportunities, and delivering scalable workflows to enhance efficiency and reduce operational costs. Adept at collaborating with cross-functional teams to ensure seamless deployment and maintenance of RPA bots, with a strong focus on quality, compliance, and continuous improvement.

WORK EXPERIENCE

TCS | Systems Engineer | Chennai

Oct 2022 - Present

- Adept at implementing UiPath **ReFramework** to build robust automation solutions, and utilizing **Document Understanding** for efficient and intelligent data extraction.
- Expertise in designing **intricate workflows** by utilizing activities, variables, and control flow mechanisms to streamline processes.
- Skilled in integrating UiPath with **REST and SOAP APIs** to facilitate seamless communication with external systems and enhance automation capabilities.
- Engineered and deployed **6 new business** processes from the ground up, while optimizing over **12 existing** workflows to significantly improve performance, efficiency, and overall operational effectiveness.
- Practiced in analyzing business processes, identifying automation opportunities, while adhering to industry standards and best practices for process automation.
- Adept in developing **use case diagrams, process models, and mapping workflows** using a range of tools to effectively visualize and optimize business processes.
- Experienced in the **SDLC** life cycle, with expertise in OCR, JSON handling, and LINQ queries.

TCS | Assistant System Engineer | Chennai

Oct 2020 - Sep 2022

- Skilled in following best coding practices, performing **unit testing, UAT** and creating comprehensive documentation such as PDD and SDD.
- Leveraged tools like **Grafana and JIRA** to visualize robot performance, while using Confluence for seamless team collaboration and knowledge sharing.
- Automated processes involving Excel, PDFs, emails, and interactions with various web and desktop applications.
- Focused on robust **error-handling** to manage business exceptions, documenting challenges, conducting code reviews to ensure reusability, reliability, naming conventions and secure data handling.

PROJECT

ELISA | Telecommunication

Payment Request Processing

Implemented an RPA solution using UiPath Document Understanding to automate invoice processing by extracting key details with OCR technology, significantly improving operational efficiency.

- Collaborated with stakeholders to identify inefficiencies, set automation goals, and implemented advanced data extraction methods including regex patterns to accurately process diverse invoice formats.
- Automated data integration into the CRM system, rigorously tested workflows, and deployed bots with robust exception handling, ensuring reliability and scalability in production.

Achievements: Minimised 70% of invoice processing time and resulting in faster payment cycles, improved vendor relationships, annual cost savings. Enhanced process visibility through detailed logs and reporting dashboards.

LIBERTY GLOBAL | Telecommunication

Ticket forwarding - Salesforce

Rolled out an RPA solution by leveraging API integration to update or create records in Salesforce, replacing the manual data entry process which resulted in a significant reduction in handling time and improved system accuracy.

- Executed API integrations on automating tasks like lead creation, account updates, and opportunity management, ensuring seamless data transfer between the RPA bot and Salesforce.
- Optimized RPA workflows for efficient API interactions, continuously monitoring bot performance and resolving issues related to data synchronization for improved speed and accuracy.

Achievements: Reduced handling time by 80% and improved data accuracy by automating numerous records in Salesforce, leading to enhanced productivity, significant cost savings, and optimized business processes through real-time, error-free updates and reduced manual intervention.

SKILLS & INTERESTS

Tools: UiPath, KOFAX RPA, JIRA, Confluence, Orchestrator, UiPath Insights

Databases: SQL, Oracle

Version Control: Git

Programming Language: Python
