Education

M.Tech in Computer Science and Engineering (AI & ML)

2022 – 2024

VIT University, Vellore, Tamil Nadu

CGPA: 8.90/10

B.Tech in Computer Science and Engineering

2018 – 2022

KL University, Hyderabad, Telangana

CGPA: 8.86/10

Relevant Coursework

- Data Structures
- Database Systems
- Operating Systems
- Computer Networks
- Artificial Intelligence
- Machine Learning
- Deep Learning
- Natural Language Processing

Work Experience

Unistring Tech Solutions Pvt. Ltd.(UTS)

Sep 2023 – Oct 2024

Embedded Software Intern

Hyderabad, Telangana

- Collaborated with DYSL Hyderabad on defense projects focused on drone-based ELINT systems.
- Developed SRS documentation, testing procedures, and project documentation to ensure clear and effective information flow.
- Implemented code for data parsing, socket programming and performed manual testing with comprehensive bug reporting.

Cognizant

Jan 2022 – May 2022

Programmer Analyst Intern

Hyderabad, Telangana

- Developed an Order Management System (MFRP, My First Real-Life Project) for an integral warehouse hub, focused on streamlining the item delivery process.
- Utilized Informatica PowerCenter tools to design and implement the system, enabling efficient shipment of commodities in different sizes and quantities as per vendor orders. Successfully enhanced the delivery process, simplifying and accelerating warehouse operations.

Projects

Toxic Comment Classification | Python, ML, NLP, EDA, Model Evaluation

May 2023

- Developed a Robust Toxic Comment Classifier using machine learning and NLP to identify toxic comments accurately.
- Evaluated and Optimized Machine Learning Models such as Logistic Regression, Multinomial Naive Bayes, SVM, and SVM with Naive Bayes features through extensive parameter tuning.
- Enhanced NLP Techniques with advanced text preprocessing, feature engineering, and TF-IDF vectorization in Python and Jupyter notebooks.

Deep Learning based Violence Detection System | Deep Learning

January 2023

- Integrated ResNet50 and MobileNet with Bi-LSTM for detecting violent activities in video footage.
- Demonstrated superior performance in real-life violence scenarios compared to existing methods.
- Aimed at enhancing emergency response by accurately detecting and alerting to violent behaviors.

Technical Skills

Programming Languages: C, C++, Python, HTML/CSS

Libraries/Frameworks: NumPy, Pandas, Matplotlib, Seaborn, NLTK, Scikit-Learn, Keras, TensorFlow, BeautifulSoup

Database Management: MySQL, MariaDB

Other Skills: Linux Fundamentals, TCP/IP, Socket Programming, CUDA C

Certifications

- Microsoft Certified: Azure AI Fundamentals
- Microsoft Certified: Azure Fundamentals
