Summary

Dynamic and results-oriented Android Developer with 5+ years of hands-on experience in developing mobile applications. Proficient in Kotlin, Jetpack Compose, Java and Flutter. Skilled in designing and integrating user interfaces, databases, and RESTful APIs to ensure the development of efficient and secure applications. Eager to leverage my expertise and contribute to a dynamic team, ready to embrace new challenges.

Work Experience

Deutsche Telekom Digital Labs

Gurugram

SOFTWARE ENGINEER - II (ANDROID)

Nov 2021 - Present

- **Roles & Responsibilities :** In charge of designing, developing and maintaining high-performance and reusable code. Worked with multiple teams as an individual contributor. Currently overseeing the T-Life app and constantly enhancing it with new features and enhancements based on product requirements and users feedback.
- **T-Life (Telecom selfcare app for T-Mobile US) :** In T-Life app, contributed significantly to the architecture design and implementation of the T-Life app from scratch, employing a clean architecture approach (MVI). Utilized cutting-edge android technologies including Jetpack Compose, Kotlin Coroutines, and Jetpack Navigation to develop a robust and innovative user experience. **Playstore**
- **OneApp (Telecom selfcare app for Deutsche Telekom Europe) :** Within the OneApp team proficiently delivered numerous projects leveraging Kotlin, RxJava, and Flutter technologies. Among these projects, notable accomplishments mentioned under Major Projects section. **Playstore**

Samsung R&D

Noida

SOFTWARE ENGINEER (ANDROID)

June. 2019 - Nov. 2021

- **Roles & Responsibilities :** During my tenure, worked with Samsung clock applications where designed and developed some features of Alarm and Timer in collaboration with cross teams working on different layers of Android operating system.
- **Team :** Worked in Samsung Clock team, part of Application Framework group under Application R&D.
- **Bedtime Alarm :** Worked on Bedtime Mode feature which allows you to set a regular sleep schedule and receive reminders when it's time to wind down for bed.
- **Timer Picture-in-Picture :** Created and integrated the Picture-in-Picture timer feature into the clock application.

Major Projects

T-Life And OneApp

Deutsche Telekom

Nov 2021 - Present

- **Engagement Loyalty Program :** As a key member of the development team, contributed to the implementation of Magenta Moments Engagement Program which helps in customer engagement through a variety of exciting features such as Telekom & Non-Telekom offers, interactive games and other rewarding experiences. **(Demo here)**
- **Campaign SDK :** Led the design and development of a versatile Campaign SDK leveraging Kotlin Jetpack Compose where campaigns are created on CMS (inhouse platform) and shown in our app. SDK is being used seamlessly into both OneApp and T-Life app.
- **Home Gateway Management :** Conceptualized and built a comprehensive router management system, empowering users to effortlessly oversee their routers and connected devices. This encompassed creating a seamless FTS (First Time Setup) onboarding journey for new routers, along with additional functionalities such as optimizing mesh device placement within the home for optimal signal strength, implementing parental control features, enabling Device blocking/unblocking capabilities, and facilitating router troubleshooting options.

Education

Indian Institute of Information Technology

IIIT Allahabad

B.TECH IN INFORMATION TECHNOLOGY

2015 - 2019

Languages, Tools And Skills

- **Programming languages :** Kotlin, Java, RxJava, Flutter (Dart), KMM, C++
- **Design and architecture :** MVVM, MVI, MVP, VIPER, SOLID Principles
- **Industry Knowledge :**
 - *Popular jetpack components :* Jetpack Compose, LiveData, StateFlow, ViewModel, Room DataBase, WorkManager and Navigation.
 - *Dependency injection :* Dagger2 and Hilt.
 - *Testing frameworks :* Unit testing & Instrumentation testing using Mockito, Mockk, Espresso.
 - *Security :* ProGuard, DexProtector and Encryption & Decryption.
- **App performance and code optimization :** Benchmarking, Profiler, LeakCanary, Lint, Detekt.
- **Tools and framework :** Git, Git hooks, Charles proxy, OpenSearch, Gitlab, JIRA, Confluence, Draw.io.
- **Leadership :** As a key member of development team, I offered guidance and mentorship to a team of 2-3 developers, ensuring their growth and development while overseeing the successful implementation of the Magenta Moments Engagement Program project.

Honors And Achievements

I'm T Count on Me

CERTIFICATE

Awarded for exceptional individual contributions to the company, exemplifying the guiding principle *I am T count on Me*. Recognized during the Second Quarter of 2023 for a noteworthy commitment to excellence. | **DTDL (2023)**

Seamless Integration of Flutter with Native Android

CHECK OUT MORE

Achieved Seamless Integration of Flutter with Native Android in OneApp resulting in a streamlined development process and significant time and resource saving. | **DTDL (2023)**
