SKILLS

TECHNICAL SKILLS

- C++ • C
- PHP • GIT • MYSQL
- Core Java • VAADIN framework

COURSEWORK

- Data Structures and Algorithms
- Object Oriented Programming
- Database Management System

Soft Skills

- Problem Solver
- R&D-Development
- Team Player

EXPERIENCE: 3 YEARS

E2OPEN | BACKEND DEVELOPER(R&D)
August 2021 - Present | Hyderabad, India

PARCEL

- Working As a **C++ developer**, I specialize in addressing CRT issues and handling Road Map Items for Parcel, a company that delivers comprehensive shipping solutions for businesses. In my role, I have contributed to various aspects of the project, including implementing features related to Rate, Ship, pick-up, delivery, Dangerous Goods Item and returns solutions tailored to meet the needs of our business customers globally.
- I Have significantly improved Parcel's services by introducing various delivery speeds, reliable tracking features, close and upload option and efficient international delivery solutions. I consistently provided support during release periods, particularly in managing Rate changes and optimizing carrier services for enhanced efficiency.

TECHNOLOGIES USED

- C++, PHP, MYSQL, STL, Win32, XML

BLUJAY SOLUTIONS | SOFTWARE ENGINEER INTERN
May 2021 - July 2021 | Hyderabad, India

YARD MANAGEMENT SYSTEM

- I played a key role in the development and implementation of the YMS Application. My responsibilities included designing and implementing features that enable businesses to effectively track and manage the movement of goods and vehicles within their yards.
- I contributed to enhancing operational efficiency, cost reduction, and safety improvement. Specifically, I worked on addressing visibility gaps in operations between transportation and warehouse, thereby creating valuable opportunities for increased agility and efficiency in the overall yard management process.

TECHNOLOGIES USED

- Java, VAADIN framework, Spring Boot, MYSQL.

PROJECT (ACADEMIC)
MULTIPLEX MOVIE TICKET BOOKING

- Provides the searching facilities based on various factors such as seats, customer, payment and show, It tracks all the information of Booking, Movie, Payment, etc. purpose of the project is to build an application program to reduce the manual work for managing seats, booking, movie, and customer.
- The project is totally built at administrative end and thus only the administrator is guaranteed access. The purpose of the project is to build an application program to reduce the manual work for managing the seats, payment, Booking, Movie. It tracks all the details about the movie, shows, Customer.

• TECHNOLOGIES USED • JAVA, Java Swing, MYSQL, Eclipse
