Developer, 03/2015 - 06/2017
Hyper Drive Information Technology Pvt. Ltd.

PROJECT SUMMARY

• Angle for SAP (Formerly Every Angle)

Angles for SAP transforms and enhances your SAP data, turning it into actionable insights. It puts the power of operational analytics into the hands of the people who need it most – the business users. Provide a real understanding of what is going on across the business – and why it's happening – enabling business users to act swiftly to control outcomes and drive significant operational and financial improvements. Transform complex SAP data into actionable insights, presented in everyday business language and easily searchable – allowing your users to quickly find information by searching for keywords. This freedom to perform their own analytics unleashes your team's investigative capability, allowing them to autonomously measure performance, analyze issues, and take action.

• teamplay

To advance digitalization in healthcare, teamplay is a departmental performance management solution that brings together healthcare professionals in a team effort. By connecting medical institutions and their imaging devices, teamplay apps aspire to create the biggest radiology and cardiology team in the world and provide its members with tools to tackle big data and the challenges of increasing cost pressure. The cloud-based solution teamplay with its apps will help you make prompt and well-informed decisions by offering an intelligible overview of your performance data.
