Career Objective: I am a highly driven C++ developer with 3+ years of experience in the automotive industry project under the camera domain for passenger vehicles. Seeking a dynamic role where my skills and experience can be harnessed to enhance software solutions, contribute to the development, and propel the organization toward new heights of success.

Education

Sagar Institute of Research Technology And Science, Bhopal, M.P. **2017-2021**
B. Tech. | Major: Computer Science and Engineering | Overall: 7.2 CGPA

Jyoti School, Jayant, Singrauli, M.P. **2017**
Higher Secondary (12th) | C.B.S.E. | Overall: 63%

Jyoti School, Jayant, Singrauli, M.P. **2015**
High School (10th) | C.B.S.E. | Overall: 7.6 CGPA

Work Experience

Wipro, Bengaluru **October 2021 – Present**
Project Engineer

- Good exposure to SDLC, in particular with the Agile Software Development Methodology, and applied its principles to streamline project workflow and convey great outcomes which adds an adaptive and proficient approach to managing projects in my ability.
- Proficient in software development for both x86 and ARM architectures with experience in working with QNX for the development of embedded software for automotive vision and safety use cases.
- Extensive experience in writing comprehensive unit tests to authenticate the functionality of individual units to ensure the robustness and reliability of the code, resulting increase in code coverage and a reduction in post-release bugs.
- Operated static code analysis tool, Coverity as a debugger to address programming quality issues by breaking down source code.
- Performed software validation testing on hardware target to ensure the reliability and effectiveness of image processing, including neural network models, for Advanced Driver Assistance Systems (ADAS) applications in real-world automotive environments, encompassing features such as driver monitoring.

Skills Learned: Agile Practices, Image Processing, Hardware Testing, Debugging, Unit Testing, Object Oriented Programming System (OOPS), Gitlab, etc.

Skills & Interest

- Technical Skills: C++, Linux, JIRA, Data Structure, STL (Standard Template Library), Python, Git, Google Test, Confluence
- Soft Skills: Teamwork, Flexibility, Communication, Adaptability, Active Listening
- Interest: Enthusiastic about travelling to explore new cultures and destinations, experiencing diverse cuisines, and maintaining a healthy lifestyle through regular gym sessions to achieve overall fitness goals.
