sujesh.pullarkat@gmail.com

CORE COMPETENCIES

Cloud Integration

Performance Tuning

Disaster Recovery Planning

Database Security Protocols

Data Migration

System Architecture Design

Backup and Recovery Solutions

Database Optimization

IT Service Management

PROFILE SUMMARY

- Possess a rich background in database administration, accumulating 18 years of expertise specifically in Oracle technologies, which has been instrumental in driving successful IT initiatives across various sectors.
- Lead the role of Senior Platform Architect at 1111 Systems India Private Limited, where strategic initiatives in database architecture and performance optimization are prioritized.
- Drive the execution of Oracle Exadata projects, ensuring that implementations align with organizational goals and deliver optimal performance for critical applications.
- Design and implement comprehensive disaster recovery strategies for over 500 databases, significantly enhancing data availability and minimizing potential downtime through meticulous planning.
- Successfully executed Oracle Data Guard implementations for more than 100 databases, conducting thorough failover tests to ensure system resilience and operational continuity.
- Exhibit strong leadership and communication abilities, effectively collaborating with diverse teams to drive project success and cultivate a culture of continuous improvement.
- Maintain extensive knowledge of business continuity and disaster recovery frameworks, enabling the design and execution of strategies that protect critical data assets.
- Expertly apply advanced backup and recovery methodologies, optimizing processes to ensure data integrity and minimize downtime across various platforms.
- Proficient in advanced database technologies and methodologies, including Oracle Exadata, Oracle RAC, and cloud migration strategies, which empower organizations to achieve optimal performance and reliability in their database environments.
- Actively engaged in continuous improvement initiatives, leveraging data-driven insights to refine database management processes and enhance operational efficiency, thereby contributing to a culture of excellence within the organization.

TECHNICAL SKILLS

- Operating Systems: Linux, Solaris, AIX (worked on LPAR and WPAR as well), HP-UX
- Other Databases: PostgreSQL, MySQL DB, DB2, MSSQL Server
- Oracle Exadata Administration
- Oracle RAC and ASM Implementation
- Oracle Data Guard Configuration
- Multi-Cloud Database Migration
- Business Continuity and Disaster Recovery (BCDR)
- Oracle GoldenGate Implementation
- Linux and Unix Shell Scripting
- PostgreSQL Database Administration
- MySQL Database Management
- DB2 Database Administration

WORK EXPERIENCE

- 1111 Systems India Private Limited | Bengaluru, Karnataka | Senior Platform Architect Database**
Apr'24 – Sept'24
- Sungard Availability Services India Private Limited | Bengaluru, Karnataka | Senior Platform Architect Database
May'13 – Mar'24
- Oracle India Private Limited | Bengaluru, Karnataka | Senior Technical Analyst
Sept'10 – Apr'13
- Wipro Infotech | Bengaluru, Karnataka | Senior Engineer Database Administration**
Feb'08 – Sept'10
- Vedic Systems India Private Limited | Hyderabad | Oracle Apps DBA
Jul'06 – Feb'08

CERTIFICATIONS

- AWS Certified Solution Architect Associate, 10/2023
- OCE Exadata X5, 03/2019
- OCP 12C, 05/2010
- Redhat Certified Engineer, 03/2007
- OCP 10G, 01/2006

REWARDS & RECOGNITIONS

- Outstanding Performance Award for contributions to high-stakes database projects.
- Recognition for excellence in project delivery and client satisfaction.

EDUCATION

- **2003:** Bachelor of Science in Computer Science, Amrita Institute Of Computer Technology, Ernakulam

WORK EXPERIENCE

1111 Systems India Private Limited | Bengaluru, Karnataka | Senior Platform Architect Database | Apr’24 – Sep’24

Roles & Responsibilities:

- Spearheaded the implementation of Oracle Exadata solutions, ensuring optimal performance & reliability for mission-critical applications across the organization.
- Architected comprehensive disaster recovery solutions for over 500 databases, enhancing data availability and minimizing downtime through strategic planning and execution.
- Executed Oracle Data Guard implementations, conducting rigorous failover testing to validate system resilience and ensure seamless operations during outages.
- Developed and optimized backup and recovery strategies, fine-tuning processes to significantly reduce backup windows and improve recovery time objectives.
- Collaborated with cross-functional teams to identify and address database performance issues, implementing solutions that enhanced overall system efficiency.
- Provided expert guidance on high availability features, including Oracle RAC and ASM, ensured robust database environments capable of supporting business continuity.
- Conducted training sessions for junior staff on best practices in database administration, fostering a culture of knowledge sharing and continuous improvement.
- Engaged in strategic planning for future database architecture enhancements, aligning technology initiatives with organizational goals.
- Implemented a comprehensive monitoring system for Oracle Exadata environments, which improved incident response times by XX%, ensuring high availability and performance for mission-critical applications.
- Developed and executed a strategic plan for database architecture enhancements, aligning technology initiatives with organizational goals, which resulted in a XX% increase in operational efficiency.

Achievements:

- Successfully implemented Oracle Exadata for a major client, resulting in a XX% increase in database performance and a significant reduction in operational costs.
- Led a team in the successful execution of a disaster recovery drill, achieving a XX% improvement in recovery time objectives compared to previous benchmarks.
- Recognized for excellence in project delivery, receiving the "Outstanding Performance Award" for contributions to high-stakes database projects.
- Developed a comprehensive training program for new hires, resulting in a XX% decrease in onboarding time and improved team productivity.
- Enhanced database security protocols, leading to a XX% reduction in vulnerabilities and ensuring compliance with industry standards.

Sungard Availability Services India Private Limited | Bengaluru, Karnataka | Senior Platform Architect Database | May’13 – Mar’24

Roles & Responsibilities:

- Oversaw the administration of Oracle databases, ensuring high availability and performance through proactive monitoring and maintenance.
- Managed the implementation of Oracle Data Guard solutions, ensuring data integrity and availability across multiple environments.
- Conducted extensive database refreshes and restores for Oracle E-Business Suite, ensuring minimal disruption to business operations.
- Automated routine database tasks using shell scripting, significantly improving operational efficiency and reducing manual errors.
- Collaborated with clients to understand their database needs, providing tailored solutions that aligned with their business objectives.
- Engaged in troubleshooting complex database issues, leveraging analytical skills to identify root causes and implement effective solutions.
- Maintained comprehensive documentation of database configurations and procedures, ensuring compliance with organizational standards.
- Participated in cross-departmental projects, contributing database expertise to enhance overall project outcomes.
- Collaborated with clients to design and implement tailored disaster recovery solutions, achieving a XX% increase in data availability and client satisfaction scores.

Oracle India Private Limited | Bengaluru, Karnataka | Senior Technical Analyst | Sep’10 – Apr’13

Roles & Responsibilities:

- Provided expert support for Oracle On-Demand customers, managing over 1000 Oracle E-Business Suite refreshes during the tenure.
- Executed database restores and recoveries, ensuring data integrity and availability for critical business applications.
- Integrated Oracle Application EBS with the Oracle database, facilitating seamless operations and data flow.
- Automated post-refresh steps using shell scripts, significantly reducing manual intervention and improving efficiency.
- Updated cloning procedures as necessary, ensuring compliance with evolving client requirements and best practices.
- Raised service requests for bug fixes, collaborating with development teams to ensure timely resolution of issues.
- Conducted RAC to RAC refreshes, managing complex configurations and ensuring minimal disruption to services.
- Engaged in continuous learning to stay updated on the latest Oracle technologies and best practices.
- Developed and implemented a comprehensive training program for junior analysts, which improved team productivity by XX% and enhanced overall service delivery.

PREVIOUS WORK EXPERIENCE

Wipro Infotech | Bengaluru, Karnataka | Senior Engineer Database Administration | Feb’08 – Sept’10

Vedic Systems India Private Limited | Hyderabad | Oracle Apps DBA | Jul’06 – Feb’08
