SUMMARY

- 4 years of experience in Manual Testing and Automation Testing (Selenium), and Web Service Testing including API Testing using Postman.
- Strong experience in the Healthcare Domain and Insurance Domain.
- In-depth knowledge of SDLC and STLC phases and testing methodologies process.
- Experience in understanding and analyzing SRS Documents.
- Experience in test planning, test strategy, estimation, scheduling, and closure.
- Excellent knowledge of Core Java Concepts.
- Hands-on experience with Black Box Testing.
- Experience in Functional, Non-functional, Regression Testing, Database Testing, UI Testing, API Testing, and Automation Testing.
- Proven work experience in software quality assurance.
- Good exposure to defect analysis.
- Proficient in designing a traceability matrix for mapping customer requirements.
- Expertise in designing, writing, and executing the test cases.
- Experience in Selenium Web Driver, and creating scripts in Selenium.
- Exposure to REST API Testing by using Postman Tool.
- Involved in executing SQL Query to perform database testing in SQL Server.
- Experience in XPath expression.
- Skilled in handling synchronization, handling popups, list box & action, TestNG & annotation designing POM classes.
- Good experience in JAVA, OOPS Concept, Collections, Array, String Class, and Exception Handling.
- Familiar with Maven, GitHub, Jenkins, Listeners, Log4j, and Automation Framework.
- Commercial experience as a Tester within an Agile Development environment.
- Extensive experience in defect management processes using tools such as JIRA.

TECHNICAL PROFICIENCIES

- Manual Testing (Web, Mobile)
- Automation Testing
- Core Java
- Selenium WebDriver
- Appium
- API Postman, Rest Assured
- MySQL
- J Meter
- Maven, TestNG, BDD Cucumber,
- Jenkins, Git & GitHub,

PROFESSIONAL EXPERIENCE

Programming.com (Mobile Programming India Pvt. Ltd.)
Quality Analyst

July 2024 – present

PROJECTS

Project 1: AmTrust Insurance

Domain: Insurance Domain

Client: AmTrust Finance, USA

Project 2: Cortex EDI Practice Management Software

Domain: Healthcare Domain

Client: Cortex EDI, USA

Project 3: Recruitment AI

Domain: AI (Artificial Intelligence) Domain

Client: Programming.com, USA

Roles and Responsibilities:

- Involved in analyzing the requirements and communicating with the BA Team for a better understanding of the requirements.
- Analyzed & validated the completeness of business requirements.
- Generated the test scenarios and test cases.
- Generated Regression Test scripts by extracting the requirements that need to be tested from available documentation and/or liaised with the relevant people.
- Developed Automation Test Scripts.
- Created POM (page object model) and test classes for the framework.
- Used Selenium automation tool with Java programming language for automation testing and Postman for API testing
- Used MySQL for database testing and Jira for bug tracking and management.
- Used agile methodology in projects.
- Retested defect fixes on each release build.
- Responsible for test deliverables, prioritizes and monitors activities to meet such dates for assigned features.
- Identified test cases and test data.
- Wrote effective and optimized Test Cases in JIRA using Black Box Testing techniques.
- Execution of test cases from the Test Lab in JIRA.
- Performed Functional Testing and Regression Testing.
- Identified test cases for Automation.
- Developed POM classes and Test classes.

EDUCATION AND CREDENTIALS

- B.E. from VDF School of Engineering Latur, Swami Ramanand Tirth Marathwada University, Nanded, Maharashtra in 2020.
