Profile

Full Stack Developer with 1 year of experience in .NET MVC, WebAPI, C#, Angular, HTML, CSS, and MS SQL. Skilled in building dynamic web applications and robust backend systems. Strong problem-solving skills with hands-on experience in ASP.NET, web services, and SQL Server database development. Experienced in optimizing large datasets and implementing complex procedures to meet business requirements. Passionate about continuous learning and delivering innovative solutions.

Key Skills

- **Back-End:** ASP.NET MVC, .NET Framework, C#, WebAPI, MS SQL Server
- **Front-End:** HTML5, CSS3, JavaScript, Angular, Bootstrap
- **Database Management:** SQL Server
- **Other Skills:** Problem-Solving, Communication, Team Collaboration

Professional Experience

WhiteBlue Cloud Services - Cloud software Associate
2023-2024

Chennai

Recruitment Portal

- Developed a recruitment portal using ASP.NET MVC and C#, streamlining candidate management, job posting, and application tracking.
- Implemented advanced reporting features to track candidate statuses (selected, rejected, interview scheduled) and optimize recruiter workflows.
- Designed complex SQL procedures for reporting and database performance, ensuring quick and efficient data processing.
- Enhanced security with email-based user authentication and automated notifications.
- Managed candidate and recruiter data using MS SQL Server, optimizing for fast retrieval and seamless data handling.

- Collaborated closely with cross-functional teams to maintain system responsiveness and ensure a user-friendly experience across all devices.

Personal Projects

Personal Portfolio Website

- Built a personal portfolio with HTML, CSS, and JavaScript to highlight projects and skills.
- Created a responsive, user-friendly interface compatible across devices.
- Enhanced navigation, interactivity, and optimized the site for fast performance.

Bookstore Management System

- Developed using .NET MVC with C#, ASP.NET, CSS, and Bootstrap for a web-based bookstore management application.
- Integrated complex features such as product browsing, shopping cart, secure payment processing, and email authentication.
- Implemented role-based access and SQL Server for data storage and efficient data handling.

CodePulse(FullStack Project)

- Full-stack blogging platform developed with .NET REST API and Angular, featuring secure user authentication with JWT tokens.
- Designed RESTful APIs for blog post management and user interactions.
- Frontend developed with Angular for a responsive and interactive user interface.

Online Courses & Certifications

- Full Stack Web Applications with Angular, ASP.NET Core Web API, Entity Framework Core - Udemy

Education

2019-2023

Bachelor of Engineering (BE) in Computer Science and Engineering ,
Alagappa Chettiar Government College of Engineering and Technology.
