Completed the online internship program on SYNTHESIS AND TIMING ANALYSIS from Entuple Technologies Pvt. Ltd. (10/2021 - 12/2021)

PERSONAL PROJECTS

Heart Attack Detection by Heartbeat Sensor (07/2019 - 11/2019)

- The Heart Attack Detection by Heart Rate Monitoring Project is designed to provide early warning indicators if a person is on the verge of experiencing a heart attack.
- This system achieves this by continuously monitoring the heart rate and promptly alerting when the heart rate deviates from the acceptable range.

Driver Drowsiness Detection Using Raspberry Pi (01/2023 - 05/2023)

- The primary objectives of driver drowsiness detection systems are to enhance road safety and prevent accidents caused by driver fatigue or drowsiness.
- These systems utilize various sensors and technologies to monitor the driver's behavior, physiological signals, and vehicle dynamics to determine their alertness level.
