Bengaluru, Karnataka, India

Profile Overview

Experienced backend developer with over 2.6 years of hands-on experience, proficient in designing and developing RESTful web services using Java and modern tools within the IoT domain. Skilled in Java, Spring Boot, PostgreSQL, Apache Tomcat, Kafka and Agile methodologies. Possesses strong problem-solving abilities and a knack for quickly adapting to new technologies.

Skills

- **Languages:** Java, SQL
- **Frameworks/Libraries:** Spring MVC, Spring Boot, Hibernate, Kafka, Distributed cache
- **Databases:** PostgreSQL, MySQL
- **Platforms:** Eclipse, PgAdmin4, Visual Studio Code, AWS (Cloud), Apache Tomcat, Linux
- **Methodologies:** SDLC, Agile, Scrum, Sprint Planning, Continuous Integration/Continuous Deployment (CI/CD)
- **Version Control:** Git
- **Technical Skills:** Debugging, Logical Thinking, Troubleshooting Skills
- **Soft Skills:** Effective Communication, Active Listening, Task Prioritization, Flexibility, Precision-focused, Team Collaboration

Work Experience

Imtac India Private Limited | Software Engineer

Dec 2021 - Present

- Utilized backend technologies such as Java, Spring Boot, REST API, Hibernate, Apache Tomcat, AWS EC2, MongoDB, Jenkins, Apache Kafka, and Distributed Cache to improve user interface responsiveness, reducing server response time by 20% when combined with HTML, CSS, and JavaScript for front-end operations.
- Applied Continuous Integration (CI) using Git Bash for version control, minimizing code merge conflicts by 20%. Adopted Continuous Deployment (CD) with the Maven repository, increasing deployment frequency and lowering deployment failures.
- Engaged in development lifecycle, including coding, testing, and debugging, producing a 30% reduction in code review time and a 20% decrease in post-release bug incidents.
- Merged new functionalities into the existing system, significantly boosting the user experience. Achieved 95% alignment with business objectives and gained stakeholder praise for improved functionality.
- Collaborated with onsite teams to understand requirements, cutting development time for complex functionalities by 15%. This led to a 20% improvement in product quality.
- Implemented solutions on staging and live environment servers, achieving a 20% increase in system stability and reliability.

Projects

Smart Streetlights Automation and Control

Dec 2021 - Present

Client: Muscat Municipality | Organization: IMTAC INDIA Private Limited

Our smart and connected street lighting solutions are designed to be scalable and customizable, allowing for easy integration with existing infrastructure. We leverage advanced sensors and IoT technologies to collect real-time data on lighting performance, energy consumption, and environmental conditions. This data is then analyzed using our Industry 4.0 Platform - Empyreal to optimize lighting performance and reduce energy consumption, resulting in significant cost savings for our clients.

- Participated in the development lifecycle, achieving a 25% reduction in post-release bugs for the streetlights project.
- Contributed to meetings, providing technical insights, improving project efficiency by 30%.
- Worked with local teams to collect requirements, shortened the development cycle for intricate features by 15%.
- Performed rigorous unit testing, enhancing overall system performance by 20%.
- Maintained detailed documentation, shortening onboarding time for new team members by 20%.
- Directed the deployment of applications on different environments.
- Delivered technical support, addressing issues promptly and boosting product satisfaction.

Education

Sir M Visvesvaraya Institute of Technology (VTU), India

Aug 2017 - Jun 2020

- Information Science Engineer
