EXPERTISE

Hadoop Ecosystem:

HDFS | YARN | HIVE | KAFKA |
SPARK | ZOOKEEPER

OS Platform: Linux | Windows

AWS Cloud: EC2 , VPC , S3 , IAM
, EMR , RDS , AWS Glue , Athena ,
Kinesis

Languages : Java , C++

Database : MySQL

Scripting : Bash Scripting

EDUCATION

Computer Science Engineering
BAMU University
2018-2021

CERTIFICATIONS

BigData 101 by IBM
Spark Fundamentals by Cognitive
classes
Smart India Hackathon

English 
Marathi 
Hindi 

PROFILE

I am enthusiastic and high-achieving IT professional with technical and analytical skills with over 4 years of experience in Hadoop and cloud administrator. Experience in deployment, management and configuration of hadoop cluster using Cloudera Manager.

WORK EXPERIENCE

Hadoop Admin

Natiquon Technologies Pvt. Ltd

April 2021-Present

Role & Responsibilities.

- While being a Hadoop admin my role and responsibility are deploying and maintain the cluster making sure the cluster is up and running.
- Commissioning and Decommissioning nodes in a cluster.
- Creating snapshots, backup of metadata , installing and configuring services are also managed by me.
- Managing Hadoop cluster on cloud Infrastructure(Iaas) of AWS.
- I also have hands-on experience with AWS cloud services like EC2, VPC, S3 , IAM and RDS, AWS Glue, Athena, Kinesis.
- Integrated various Hadoop Ecosystem services like HDFS, YARN, HIVE, KAFKA , SPARK and ZOOKEEPER.
- Configuring Namenode to ensure high availability for HDFS.
- Secured Cloudera Hadoop cluster with Kerberos authentication using Active Directory and sentry for authorization.
- The cluster planning and capacity planning under the senior Architect.
- Troubleshooting application error and ensuring that they do not occur again.
- Performance tuning and running job in hadoop cluster.

Associate Hadoop Admin

Feb 2020- March 2021

- While being an associate Hadoop admin my responsibility was monitoring the cluster.
- I also have hands-on experience with AWS cloud services .
- Monitoring the Hadoop cluster to check whether it is up-to-date and constantly running.
- HDFS File system management and monitoring.
- Resource and security management .
- Performance and monitoring tuning.
- Managing and reviewing log files in Hadoop.
- If any issue occurs again then raised the ticket.
