Professional Summary

Detail-oriented and highly skilled RPA Developer with 3+ years of hands-on experience working at Capgemini on UiPath automation solutions. Adept at designing, developing, and deploying end-to-end automation workflows. Proven expertise in optimizing business processes, increasing efficiency, and delivering high-quality robotic solutions. Strong understanding of UiPath Studio, Orchestrator, and various RPA components. Seeking to contribute my skills to a dynamic team to drive automation excellence.

Technical Skills

- **RPA Tools:** UiPath Studio, UiPath Orchestrator, UiPath Robot
 - **Languages:** C#, VB.NET, Python (for automation tasks)
 - **Database:** SQL Server, MySQL
 - **Version Control:** Git
 - **Automation Workflow Design:** Sequence, Flowchart, State Machine
 - **Orchestrator:** Deployment, Scheduling, Monitoring Bots
 - **Others:** Web Services, REST API Integration, Excel Automation, PDF Automation
-

Professional Experience

RPA Developer | Capgemini

Dec 2021 – Present

Location: Hyderabad

- Developed and maintained robotic process automation solutions using UiPath for various business processes, increasing productivity and reducing operational costs.
- Designed reusable workflows using UiPath Studio, implemented custom activities, and applied best practices for optimization and error handling.
- Deployed and scheduled robots using UiPath Orchestrator, ensuring seamless operation of bots in production environments.
- Collaborated with cross-functional teams to understand business requirements and deliver automation solutions that aligned with business objectives.

- Conducted UAT and post-production support for RPA solutions, ensuring robust performance and quick issue resolution.

Key Responsibilities:

- End-to-end automation using UiPath Studio, including design, testing, and deployment.
 - Developed complex workflows for data extraction, validation, and report generation.
 - Integrated UiPath with web applications, databases, and third-party tools to automate tasks.
 - Led the process of creating reusable components, workflows, and libraries for future automations.
 - Optimized workflows for performance, scalability, and maintainability.
 - Performed bot monitoring, logging, and error handling within Orchestrator.
-

Projects

1. Invoice Processing Automation

- **Role:** Lead RPA Developer
- **Technologies Used:** UiPath Studio, Orchestrator, OCR, Excel, Email Automation
- **Description:** Automated the end-to-end process for invoice receipt, validation, and data extraction. Integrated OCR technology to read invoices and extract relevant data, performing validation checks against existing records.
- **Responsibilities:**
 - Designed and developed the workflow using UiPath Studio to extract invoice details.
 - Integrated UiPath with Excel for data entry and verification.
 - Used email automation to send processed invoices to the finance team for approval.
 - Deployed and scheduled bots using UiPath Orchestrator to handle daily tasks.
 - Improved processing time by 70%, minimizing human error and speeding up invoice processing.

2. Employee Onboarding Process Automation

- **Role:** RPA Developer
- **Technologies Used:** UiPath Studio, Orchestrator, SAP, Active Directory
- **Description:** Automated the employee onboarding process, which involved creating user accounts, setting permissions, and enrolling in company systems.
- **Responsibilities:**
 - Developed a workflow to create and assign Active Directory accounts for new employees.

- Automated the creation of user profiles in the HR system (SAP).
- Integrated with various internal systems for smooth transitions across different departments.
- Reduced manual processing time by 60% and increased accuracy in employee onboarding.

3. Data Extraction and Reporting Automation

Role: RPA Developer

- **Technologies Used:** UiPath Studio, SQL Server, Excel, UI Automation
 - **Description:** Automated the extraction of data from legacy systems and the creation of monthly reports.
 - **Responsibilities:**
 - Developed workflows to scrape and extract data from web portals and legacy systems.
 - Implemented SQL queries to retrieve and process data for report generation.
 - Automated the reporting process by generating Excel-based reports and distributing them via email.
 - Reduced manual effort by 80% and provided management with real-time reporting capabilities.
-

Education

Bachelor of Technology (B.Tech) in Computer Science

SR University– 2017-2021

Certifications

- UiPath Orchestrator Training – [2021]
-

Achievements

I have received “SuperSHeroes” an award at Capgemini for my contribution in the excellence to the organization in 2023.

I promoted as a support lead due to my communication & delivery skills with the clients and business.

Additional Information

- Strong communication and collaboration skills, with the ability to work effectively with clients and teams.
- Detail-oriented and committed to delivering high-quality RPA solutions on time.
