Linkedin:<https://linkedin.com/Dhamodhar-t-v>

Machine learning Engineer with 8 years of experience in designing, implementing & deploying LLMs, and AI models, including fine tuning Transformer-based architectures. Proven expertise in DL, NLP, ML, & creating innovative AI-driven applications.

EDUCATION

Gitam Institute of Technology,Bangalore <i>Btech, Electronics and communication,CGPA-7.8</i>	Oct 2012- Apr 2016
Narayana College,Tirupati <i>MPC-93%</i>	2010-2012
Bhashyam High School,Tirupati <i>SSC-93%</i>	2009-2010

PROFESSIONAL EXPERIENCE

Synechron Technologies:AI/ML lead-Bangalore	Dec2022– Present
- Working for projects in R&D team for their customer services and financial services and investment firms to improve business and meet client needs. - Builds generative AI apps like customer tech support bot using RAG,Automating SDLC life cycle using Gen AI to improve developer productivity and reduce manual efforts using frameworks like langchain,Llama Index and Crew AI for agents building. - Models used:Foundation models(Open AI,claude)Open Source:llama(all variants),flan,Mistral - Vector databases:Chroma DB,Qdrant - Designed a Retrieval-Augmented Generation (RAG) systems to improve information retrieval for various use cases,finetunes LLM using LORA techniques for cheque digitization for various banks. - Builds agentic AI acclerators for cheques,invoice processing using multimodals as backend models and using frameworks like langraph,crew AI. - Works with deployment teams to ensure scalability using various tools like GIT and designs API's using fast API as backend and build webapps as final products.	
Wipro AI solutions:Senior ML engineer-Bangalore	Aug 2021 – Dec 2022
- Developed a solution using SOTA ML techniques to improve their tagging score to 95 percent and reducing manual effort by 50 percent for one of the largest telecom client.and also developed also worked for Document processing using OCR techniques. - Used Open CV library for image preprocessing as a part of document processing. - Frameworks use:Pytorch - Used models like MBERT,XLMRoberta and SHAP,LIME for explainability to various leaders. - Worked on inference frameworks like tensor RT to improve inference time. - Worked with client for tasks like named entity recognition and topic modelling using libraries like spacy,NLTK,top2vec,bert topic and LDA. - Worked with MLOPS tools like ML flow for deployment.	
Capgemini:Senior Consultant-Bangalore	Dec 2019 - Aug 2021
- Developed a solution for invoice tagging using Random forest classifier and reduced the manual effort by 60 percent time. - Worked with different teams on ETL process and extracting and preparing KPI's for the client. - Developed dashboards using Tableau for sales reporting. - Been part of internal tool for automating classification tasks especially images.	
Flashcash:Junior Data Scientist-Bangalore	Feb 2019 - Dec 2019
- Developed a solution for emails as an API classifier so that automatic tagging of mails happened on daily basis to prevent misclassification using Random Forest Classifier - Developed a chatbot using google dialog flow for customers to interact with agents - Worked with SQL in extracting the data for model building.	
TechMahindra:Senior Software Engineer-Bangalore	Aug 2016-Feb 2019
- Developed few POC's and mainly involved in analysis using various tools Developed KPI reports for the client using python as a part of POC. - Solved and developed few dash boards using python and tableau.	

TECHNICAL SKILLS

Technologies and Programming: Python,Machine learning,Deep learning,Generative AI,LangchainTransformers,Pytorch,MLflow,computer Vision
Data bases: MYSQL, SQL,Pyspark

AWARDS

- Best team, 03/01/22, Recognized as best team for two consecutive quarters client
- Hackathon, 01/01/23, Recognized as top ideas for the syne hackathon across the organization
