PROFESSIONAL SUMMARY

- Having 3.5 years of experience in design, analysis, development, and implementation of various applications environment using BI Tools. Experience in Data Warehousing and Business Intelligence area in various domains.
- Strong hands-on experience implementing dash-boarding, data visualizations, and analytical skills using **Tableau desktop & Tableau Server**.
- Proficient in developing KPI's and Dashboard and providing best data **visualization solution**.
- Good interaction with clients, understanding Business Applications, Business Data Flow and Data Relations
- Experience in developing and deploying Visualization Solution for actionable items using **Tableau Desktop** various features like Actions, Filters, Parameters, Sets, Extracts & Live, Customized Maps, Table Calculations, Calculated Fields, Performance Tuning, etc.
- Strong knowledge on **YTD, QTD, MTD & Time - Series** analysis calculation.
- Experienced in **Tableau Site Administration** like Publishing and Scheduling Dashboards & Extracts, User/Group Management, etc.
- Good in **SQL writing skills** and good knowledge of performance tuning & optimization.
- Implemented **Row-level security** and Tableau security to ensure data access control.
- Experience using **SQL Server, PostgreSQL, Excel, Databricks & Alteryx** for ETL processes and data preparation.
- Good Experience on **Data Validation** to Ensure the Data Quality.
- Using **PostgreSQL, SQL Server, Azure Databricks, Snowflake & Azure SQL** as Data Source.
- Merge multiple data sources by **Joining, Relationship** and **Data Blending**.
- Team player with good communication and interpersonal skills.
- Takes initiative to acquire new skills and knowledge, staying up-to-date with industry trends.

WORK EXPERIENCE

NTT DATA India

Mar 2024 – Present

Client: Mercedes-Benz Research & Development India)

Senior Tableau Developer/ Sr. Data Analyst

Domain - Automobile Manufacturing

Project Overview - This project is all about Research and Development of Mercedes-Benz car's & VAN's daily operations for Engines powertrain of the vehicle.

Key Responsibilities:

- Requirement gathering and data mapping sessions to understand business needs.
- Designed, developed, tested, and maintained Tableau functional reports based on user requirements.
- Mastered ability to design and deploy Graphic visualizations with Drill Down and Drop-down menu option, **Binned scatter plots**, control visibility using value Parameters using Tableau.
- Leverage **Azure Databricks** for efficient **ETL** processes and data validation.
- Created **ADF** pipeline to copy the source data from different source to the Target source (**AZURE Data Lake**)
- Employ **Git/GitHub** and **Azure Data Pipeline** to establish effective **CI/CD** practices, automating deployment and improving efficiency.
- Collaborated with **cross-functional** teams to implement and fix existing complex issues with proper documentations.
- Utilized Tableau server and MBRDI Portal to publish and share reports with business users.
- **Optimize** Tableau visualizations to significantly reduce dashboard loading time 1 min to enhancing user experience and enabling timely insights.
- Deciding different test scenarios for **QA and UAT** phases, ensuring the quality and reliability of data solutions.
- **Automate Tableau workbooks** and implement email notifications to provide users with real-time status updates on workbook success or failure.
- Experience in maintaining & migrating reports from excel & PowerPoint (static) based solution to an interactive service.

Capgemini India Tableau Developer

Jan 2021 – Feb 2024

Domain – Sales, Supply Chain, Vendor Management & Human Resource

Project Overview - This project is all about development and daily operations for IKEA with BI solutions for various departments. There are more than 40+ workbooks from multiple domains, which are in our scope.

Key Responsibilities:

- Preparing technical specification documents for the report to follow while development Reports/Dashboards.
- Designing and developing tableau dashboard for the user and always trying to present in a better way.
- Utilize **Alteryx** for efficient **ETL** processes and data validation.
- Deciding different test scenarios for QA and UAT phase.
- Publishing reports to server and providing proper access to the users based on internal distribution list portal.
- Maintain Existing and Future reports distributions.
- Enhance existing process utilizing best practices and latest technologies.

SKILLS

- **Programming and Query Language:** SQL Server, PostgreSQL, Python, NumPy, Pandas, Matplotlib & Plotly.
- **Data Analysis Tools:** Jupyter Notebook, VS Code, Azure Databricks, Azure Data Factory & Excel.
- **Cloud:** Azure
- **ETL Tool:** Alteryx & Azure Databricks
- **Version control:** Git & GitHub
- **Project Management Tool:** Jira & Confluence
- **Data Visualization Tools:** Tableau Desktop, PowerBi, Tableau Cloud Tableau Server & Excel.
- **Soft Skills:** Problem Solving, Critical Thinking, Self-motivated, Adaptive, Resilient, Multi-Tasker & Team Player

WORK SAMPLES

COVID-19 Analysis Dashboard

[View Project](#)

- Built a **Tableau** dashboard to showcase key points Covid 19 **KPIs** (Effect, Doses, Population).
- Transformed and filtered data by using aggregating and filtering function to improve reporting process.

NEO BANK Analysis

[View Project](#)

- Cleaned and prepped Neo Bank data using **SQL Server** to improve on Business growth.
- Conducted comprehensive analysis of customer demographics, providing insights into gender distribution and other key factors.

Heart Failure Analysis Dashboard

[View Project](#)

- Developed a **Tableau** dashboard to visually represent key metrics related to heart failure, providing a comprehensive overview of patient data.
- **Designed** an interactive Tableau dashboard allowing healthcare professionals to explore and analyze heart failure data dynamically through **user-friendly** filters and parameters.

Superstore Alteryx Workflow

[View Project](#)

- Developed an Alteryx workflow to effectively connect and integrate Order, people, and other relevant sheets, streamlining data analysis and reporting processes.
- Utilized many advanced aggregation and filtering functions to enhance data quality and refine reporting outputs.

EDUCATION

Marwari College Ranchi

BCA (Bachelor of Computer Applications) – 73.2%

2017-2020

CERTIFICATIONS

- Google Data Analytics by Google
- Microsoft Certified Azure Fundamentals (AZ-900)
- Agile Software Development.
