Experience Summary

- I have over 2+ years of experience in Software Design, Analysis, Development, Deployment, and Maintenance of business applications with Microsoft .Net technologies.
- Experience in Software Development Life Cycle (SDLC) that includes Requirements Analysis, Design, Coding, Testing, Implementation, Maintenance with methodologies like Waterfall Model and Agile Methodologies, participate in and contributes to Agile Ceremonies.
- Extensive experience with .Net Framework, C#.NET, ASP.NET, MVC.NET, ADO.NET, Entity Framework, WCF, Kendo UI, JavaScript, jQuery, Bootstrap, CSS and HTML 5.
- Extensive experience in development of WCF Services to leverage the application to Mobile and Desktop users.
- Experience in Object Oriented Programming (OOP) design and development concepts with N-tier Architecture.
- Experience in version controlling system such as TFS and GitHub for Requirements, Tasks and Bug management for Test-Driven Development.
- Designed and developed Database engineering such as Creating databases, Tables, Complex Stored Procedures, Functions, Views, Triggers, Jobs and SQL Performance Tuning aid better data manipulation and consistency.
- Worked extensively on creating and calling complex Stored Procedures, Views and Functions using MS SQL Server.
- Used DAO access and writing DML, DDL, and triggers for SQL Server database and other client environment-specific tools to design the client module.
- Experience in .NET security features such as Authentication (Windows and Form based) and Authorization (Authorizing users and roles).
- Experience in applications performance problems and tuning of databases.
- Excellent Team member with an ability to perform individually, good interpersonal relations and high levels of motivation.
- Programmer successful at deployment of Enterprise Web Application with excellent network infrastructure, working towards project milestones, quality assurance and on-time delivery.
- Ability to work individually as well as in a team with excellent problem-solving skills, and troubleshooting capabilities, learn new tools and concepts.
- Experienced in preparing and executing Unit Test cases.

Engagement Overview

Project: NSI

Aug 2022 to Till Date

Role: .Net Developer

Client: National Security Institute - UAE

NSI training management system web application is a streamlined version of what you already do on a daily basis for security training. It's designed to organize your training delivery and optimize the commercial aspects of your training business. This Implementation system has greatly reduced the administrative tasks and increased the cash flow. Application allows internal staff to organize course logistics and resources, automate manual tasks, manage finances, reports and business intelligence. Also, same way provides a self-service portal for registrants and a company portal for team managers. System offering face-to-face sessions, virtual learning, or a mixture of both to administrative tasks for successful courses and certifications.

Responsibilities:

- Collaborated with product management to design, build and test systems.
- Implemented Team Explorer for version control using VSTS.
- Strengthened developmental methodologies by introducing a code quality document.
- Worked closely with clients to establish problem specifications and system designs.
- Provided the possible resolution such as Code fix/Data Change Request/Configuration setting by root cause analysis and investigate the code.
- Designed and developed Graphical dashboards, metrics and reporting to analyze data and support strategic decisions.
- Implemented LINQ for querying, sorting, filtering the complex objects.
- Created framework for client-side validation using jQuery.
- Developed MVC UI front-end components using HTML5, CSS, Bootstrap 3 in Razor views.
- Developed JavaScript as Validation part at client-side entry information Maintained build versions and code versions using subversion.
- Worked in RDLC Reports.

Technical Environment: Windows Server 2016 R2, Microsoft SQL Server 2016, IIS 10, MVC 5, C#, WEB API 2, Entity Framework 6, Windows Services, JSON, Kendo UI, RDLC Reporting, Bootstrap, HTML5, CSS3, JavaScript, jQuery, Microsoft Visual Studio 2017, SQL Developer, MS Office and Notepad ++.

Technical Summary

Development Methodologies: Waterfall and Agile.

Programming Tools: MS Visual Studio, MS SQL Server.

Configuration Management Tools: TFS & GitHub.

Programming Languages: C#.NET, ASP.NET, MVC.NET, WebAPI, WCF, Entity Framework, LINQ, SQL Server Stored Procedure and Functions.

Databases: MSSQL Server.

Web Server: Internet Information Service (IIS).

Scripting Languages: JavaScript, jQuery.

Internet Programming: Razor, HTML5, CSS3 & Bootstrap.

Data Exchange Languages: JSON & XML.

Operating Systems: WINDOWS 10 & Windows Server 2016 R2.

Education

Master of Computer Application (MCA) in P.K.R.Arts College For Women - Bharathiyar University, Coimbatore.

Current/Previous Employer

.NET Developer	Teknip Technologies Pvt Ltd, Chennai.	August 2022 – Till Date
