Summary: Currently working as Sr. Service Transition and Transformation Manager. I have been doing the program/project and service delivery management for SAP ERP infrastructure, SAP BASIS related projects and programs for various global customers to provide services in SAP ERP infrastructure related to transition and transformation, cloud migrations (AWS, Azure cloud, on prem to cloud), SAP upgrades (sps, ehps, nw etc), new SAP landscape builds, T&M based BASIS services for SAP functional projects mainly. I have been doing overall project service management from the pre-sales stage stage to project closure, scope defining, proposal creation, costing (fix, T&M) with extensive direct client facing, I have also worked as SAP ERP BASIS Service delivery manager (SDM) to manage the SAP BASIS L1/L2/L3 ITIL / ITSM SLA based BASIS operations, day to day team management, performing performance appraisals, handling attritions, driving continuous process and service improvement plans etc.

Work Experience Summary:

Lemongrass Cloud Consulting (Sep 2024 – till date) as Service Transition and Transformation Lead: Working as transition manager to onboard the new customers in the organization tools and services along with transitioning the migrated systems and knowledge transfer from project teams to operation teams to ensure the stable and smooth RUN support. During my tenure with LG, I have worked with the cloud migrations teams to complete the operate transition for customers i.e. [Cargill\(Azure\)](#), [Radisson Hotel Group\(AWS\)](#), [Mondelez\(AWS\)](#), [Diamler Trucks\(Azure\)](#), [Refresco\(AWS\)](#).

DXC Technology/HPE/HP Global soft. (Oct 2004 – Aug 2024) Elysium Program as Project/Program Manager for customers [Duracell & Irish Meats](#) to migrate the existing from SRA/HP SM9 based monitoring to DXC PaaS for SAP based SAP FRUN/SNOW.

Customer: Syngenta AG. as SAP ERP Project Service Lead (2015-2017 & 2019-2023).

As Program/Project Manager: Client facing and managing multiple internal and external stakeholder i.e. SAP project managers, solution integrators, Solution Architects, technical consultants from various teams like cloud ops, SAP, OS, Backup etc., driving and contributing in pre-sales tasks i.e. understand and collect the project requirements, convert it into scope statement, SOW, perform the effort estimation and cost evaluation (Fix, T&M), complete the proposal creation(RFP, RFI) and quote submission based on Aries/Aldea NSSR tool, Overall management of the all projects under SAP ERP program, monitoring and control the implementation, finance and cost management for fix and T&M based projects, project closure with proper handover and documentation to operation teams.

ECC to S/4 conversion POCs: Managing the S/4 conversion POCs to start the S/4 conversion journey by building the shell systems, transferring sliced data using SmartShift, HANA conversion.

AWS and DXC VPC Migrations of entire Syngenta SAP systems from on-premise to DXC VPC using export/import approach and then after couple of years, DXC VPC to AWS Cloud oracle data guard data sync.

SAP CFIN (Central finance) - S/4 HANA, SLT, MDG, B/4 HANA landscape builds, SAP BASIS configuration tasks as part of CFIN implementation and HANA upgrades.

SAP SAC to CFIN setup: Configuring the SAC (SAP Analytical cloud) with CFIN systems i.e. S/4 HANA and B/4 HANA, ALB setup, btp configurations with principle configuration etc.

Mid size projects: Multiple SAP green field landscape builds, SAP SPS, EHP, SPS and NW version upgrades,

SAP BASIS support for SAP functional implementation projects: Delivering the regular SAP BASIS support for the functional projects by utilizing SAP BASIS operation teams in a multi stakeholder environment.

Customer: **SEG/Sulzer/DBPL** (2018 to 2019) as Project Manager.

Managed the SAP migrations from on premise to DXC ESO (enterprise solution on demand) which is based on DXC's PaaS for SAP infrastructure as an end to end service cloud model, handled end to end project management responsibilities starting from project initiation till the project closure.
