WORK EXPERIENCE

Artificial and Machine Learning Intern

Thinking Stack

Bengaluru, Karnataka

- Developed and curated datasets to ensure high-quality input for training machine learning models, focusing on medical applications.
- Conducted hyperparameter tuning to enhance model performance, utilizing techniques to identify optimal configurations for improved accuracy and efficiency.
- Implemented computer vision techniques using OpenCV and TensorFlow for detecting medical images and objects, enhancing diagnostic capabilities.
- Utilized the YOLO (You Only Look Once) model for efficient text extraction from medical images, improving data accessibility and analysis.

Artificial and Machine Learning Intern

June 2024 - Aug 2024

AITEUR

Bengaluru, Karnataka

- Curated and preprocessed large datasets, ensuring readiness for model training by cleaning and normalizing data.
- Fine-tuned pre-trained models (SDXL LoRA), optimizing hyperparameters to improve accuracy and reduce overfitting.
- Conducted exploratory data analysis (EDA) using Python libraries like Pandas and Matplotlib, identifying trends and insights for model improvement.
- Collaborated with teams to deploy machine learning models into production, ensuring smooth integration and scalability.

Full-Stack Developer Intern

October 2023 - March 2024

TATA Aerospace and Defence

Hyderabad, Telangana

- Championed the creation of a community app incorporating HTML, CSS, JavaScript, Python (Django), and Mendix. Led both frontend and backend operations, designing the user interface, and embedding robust backend logic..
- Integrated RESTful APIs (HTTP) for seamless communication between services.
- Effectively communicated project requirements and progress with team members and stakeholders through regular meetings and reports
- Utilized data structures to optimize backend logic and API performance.

PROJECTS

Image Generation Using Stable Diffusion XL(Dreambooth)

- Fine-tuned Stable Diffusion XL models with limited subject images using Dreambooth, enhancing photorealism.
- Developed a user-friendly interface for image generation from textual descriptions, fostering user engagement.
- This innovation holds promise for digital art and marketing, showcasing proficiency in Python, PyTorch, and Transformers and NLP.

Conversational Intelligence: Build Your AI Chatbot with Next.js and Gemini!

- Engineered a scalable and efficient web application utilizing Next.js, ensuring optimized server-side rendering and improved performance metrics.
- Integrated the Gemini AI API, enhancing the chatbot's capabilities for contextual understanding and sophisticated conversational flow.
- Designed a modern and responsive user interface leveraging Vercel AI web components, focusing on user experience and accessibility.
- Developed a chatbot that provides instantaneous responses, fostering engaging and interactive user experiences.

Automatic Number Plate Recognition (ANPR) with Python, YOLOv8, and EasyOCR

- Implemented a robust ANPR system integrating YOLOv8 for precise vehicle detection and EasyOCR for accurate license plate character recognition.
- Enhanced surveillance capabilities by automating the identification of license plates in images and videos, contributing to efficient traffic management solutions.
- Utilized regression analysis for improving the accuracy of license plate recognition.
- Predictive Models: Developed predictive models to enhance the system's ability to accurately recognize and predict license plate numbers.

CERTIFICATIONS

- Machine Learning with Python by Great Learning.
- Successfully completed AI for everyone by coursera.
- Data Analytics with Python
- A Certified Smart Coder by Smart Interviews:<https://smartinterviews.in/certificate/38d14203>

EDUCATION

B V Raju Institute of Technology - BVRIT	Hyderabad,Telangana, India
<i>B.Tech in Computer Science and Machine Learning, CGPA-8.16/10</i>	<i>Expected passout year is 2024</i>
<i>Relevant Courses: Database Management, Machine Learning, Artificial Intelligence,Statistics</i>	
Sri Chaitanya Junior College	Hyderabad,Telangana, India
<i>Telangana Intermediate Board of Education - MPC, CGPA-9.3/10</i>	<i>May 2020</i>

TECHNICAL SKILLS

Programming Language: C , C++ , Python
Web Development: HTML , CSS , jQuery , JavaScript , Mendix Low-Code platform,Django
Frameworks: ReactJs , Node.Js
Technologies: LangChain , Machine Learning , Deep Learning , Data Science , computer vision , TensorFlow , OpenCV
Tools/IDEs: Git , Visual Studio Code , Excel , Mercurial , SVN
Databases: MYSQL,MONGODB,SQL
Methodologies: Agile
Libraries: NumPy,Pandas
Additional Skills: LangChain, Keras, NumPy, Pandas, NLP
