Education

JSPM's Bhivarabai Sawant Institute Of Technology & Research

Pune, Maharashtra

Bachelor of Engineering in Information Technology, CGPA: 8.77

Dec 2020 – May 2024

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Operating System
- Machine Learning
- Software Engineering
- Database Management
- OOP Concepts
- Business Intelligence

Technical Skills

Languages: OOPs, C++, Python, SQL

Web Technologies: HTML5, CSS, JS, React, MongoDB, Node.js

Data Analysis: Numpy, Pandas, Matplotlib

Data Visualization Tools: Tableau

Familiar With: ML Algorithms, Java, Angular JS, AWS, Cloud Computing

Developer Tools: VS Code, Git, Github, MongoDB Atlas, MongoDB Compass

Experience

Utkarshini Edutech

Nov 2022 – Feb 2023

Machine Learning Intern

- Designed and implemented an efficient Twitter Spam Classifier using Python and Streamlit, achieving a remarkable accuracy of 97 Percent.
- Enhanced spam detection accuracy by 40 percent using advanced NLP algorithms
- Conducted data scraping to extract valuable information for actionable insights.
- Skills: Data Analysis, Streamlit, ML algorithms, Model selection.

Spark Foundation

May 2022 – June 2022

Front End Developer Intern

- Developed a web-based Basic Banking System using HTML, CSS, and JavaScript, improving user experience and accessibility
- Enabled seamless virtual money transfers among users while maintaining transaction records.
- Skills: HTML, CSS, JavaScript, Bootstrap

Projects

PCMC Web Portal | MERN Stack

- Developed a user-friendly React web portal with MongoDB integration for 24/7 grievance lodging.
- Enabled users to submit complaints, connect with authorities, and streamline issue resolution.
- Contributed to full-stack development, improving citizen engagement and optimizing communication channels.

Multiprocessing Community Website | HTML, CSS, JS

- Developed a college community website using Bootstrap, HTML, CSS, and JavaScript
- Implemented front-end functionalities to enhance user experience.
- Ensured cross-browser compatibility and optimized website performance using best web development practices.

Weather Watch: Keep A Close Eye on The Skies | React

- Created a real-time React weather application featuring API integration and an intuitive design.
- Delivers current weather data for any city through dynamic updates and a user-responsive interface

Achievements / Extracurricular

- Solved 350+ DSA Problems across Multiple Coding Platforms.
- Participated in Hacktoberfest 2022, 2023.
- Advanced to the Coding Final round of TechGig Code Gladiators 2023.
- College Campus Ambassador at Techfest IITB.
- Earned 5 stars at Hackerrank, showcasing expertise in practicing DSA and OOPs with C++
