SUMMARY

Experienced Software Test Engineer with over 3.2+ years of experience, demonstrating a history of working in the Banking, E-Commerce, and Hospitality domains, both in Automation and Manual Testing roles.

TECHNICAL SKILLS

Manual Testing | Java | Selenium WebDriver | REST API | TestNG | TDD,BDD | SQL Server | JIRA | Postman | Agile | Scrum | Automation Testing | Database Testing | SDLC |STLC | GIT |UAT | Mobile Testing (IOS/Android) | Web Application Testing | HTTPS Methods | Documentation | Jenkins | Cypress | Cucumber | Maven |Functional Testing | Bug Tracking | OOPS |

EMPLOYMENT

Freelance Test Engineer

January 2024 to Present

Self-Employed, Pune

- Successfully reduced the average release cycle time by 30% for a major client through a combination of manual and automation testing, driving faster product delivery and enhanced quality.
- Led the development of scalable test architectures for diverse clients, increasing testing efficiency by 25% and achieving faster time-to-market by ensuring seamless integration of technologies and tools.
- Improved overall testing efficiency by 20% through the creation and execution of comprehensive test cases based on functional specifications, resulting in better coverage of edge cases and user stories.
- Enhanced software stability by 99% by performing rigorous regression testing, resolving critical issues prior to release, and collaborating closely with developers to streamline the quality assurance process.
- **Technologies used:** | Manual Testing | Java | Selenium | SQL | Agile Methodology | Jira | Regression Testing.

Software Quality Analyst

Nov 2022 to Aug 2023

Avendata Gmbh Pvt. Ltd . Mumbai.

Role & Responsibilities :

- Reduced manual testing effort through effective test case prioritization and streamlined manual regression testing, improving overall test efficiency and providing quicker feedback to developers.
- Executed 1000+ manual test cases on web and mobile application, enhancing test accuracy and ensuring all functional and performance requirements were met.
- Collaborative team player with strong communication and analytical skills, focused on delivering results.Proactive leader with expertise in problem-solving, stakeholder engagement, and cross-functional teamwork
- Performed functionality testing, retesting, and regression testing, identifying and documenting defects, resulting in a faster development cycle and improved software reliability, while supporting UAT testing.
- Streamlined defect resolution by documenting issues with precision, leading to a faster development cycle and fewer user-reported issues, ensuring adherence to Agile methodologies. Automated a portion of test cases using Java/Selenium/TestNG, while conducting API testing with Postman and database verification with MS SQL, improving testing processes and adhering to the latest software testing standards.
- **Technologies used:** Java, JIRA, Regression Testing ,Sanity Testing, Smoke Testing ,Test cases Creation & Execution ,RTM, End To End Testing,UAT,

IT MNC GROUP, Noida.**Role & Responsibilities:**

- Led comprehensive testing of an online food delivery app by developing and executing detailed test plans covering functionality, edge cases, and user stories. Increased test efficiency by 20% through automation using Selenium and BDD framework.
- Conducted manual and automated testing for UI/UX and API testing, leveraging Postman and SQL for database validation, ensuring smooth operation of customer-facing features and backend processes.
- Streamlined defect resolution and bug tracking using JIRA, resolving 99% of identified issues before release. Applied OOP concepts and automation techniques to boost testing coverage and reduce manual efforts, aligning with Agile practices.
- Spearheaded an Agile collaboration initiative among the related stakeholders and developers; ensured rigorous execution of all test phases while achieving a record defect resolution rate of over 99% before software release deadlines.
- **Technologies used:** Java, Maven, Selenium WebDriver, Rest Assured, TestNG, JIRA, Manual Exploratory Testing Function Testing, Selenium WebDriver.

PROJECTS

- ViewBoxes (Web Based Application) Nov 2022 to Aug 2023
 - End-to-End Testing as a Software Quality Analyst, conducted thorough functional, regression, and UAT testing to ensure seamless data migration, legal compliance, and universal access across clients like NordLb, DZ Bank, and Philips.**Improved System Stability & Reliability:** Identified and resolved 30+ critical issues, enhancing system reliability and reducing defect leakage by 20%, ensuring a robust archiving platform for global compliance needs.
- OrderApp (E -Commerce) July 2020 to Nov 2022
 - Tested an e-commerce platform enabling customers to place delivery or pick-up orders seamlessly.**Quality Improvement:** Uncovered critical bugs in payment and ordering, reducing system downtime by 25% through End-to-End testing.**Collaborative Testing:** Acted as a liaison between development and product teams, implementing risk-based testing to enhance testing efficiency and focus on high-impact areas.

EDUCATION

Masters in Computer Technology	Shivaji University Kolhapur.	Batch 2018-2021
Bachelor of Science	S.G.M.College, Karad.	Batch 2015-2018

DECLARATION

I hereby confirm that all the details furnished above are authentic and accurate to the best of my belief. I hereby declare that the information and details provided in this resume are correct and inclusive to the best of my knowledge.
