

UJWAL

CAREER OBJECTIVE

A highly motivated and enthusiastic fresher with a strong foundation in AWS cloud services and DevOps practices. Seeking an entry-level position to apply knowledge of cloud infrastructure, automation, and CI/CD pipelines. Eager to contribute to efficient system deployment and management while continuously learning and growing in a dynamic DevOps environment.

WORK EXPERIENCE

AWS and Devops intern

Microdegree- 07/2024 - 10/2024

- Actively worked, managed and improved various AWS services like EC2, S3, VPC, CloudFront, IAM, Route53, CloudWatch, Cloud Trail, RDS, including AWS Backup, Load Balancer and Auto Scaling.
- Designed and deployed secure VPC architectures in AWS using private and public subnets, implemented security groups and network ACLs to control inbound and outbound traffic, and had good experiences in AWS backup services (backup and restoration)
- Utilized Git for version control and Jenkins for continuous integration and continuous deployment (CI/CD) pipelines.
- Containerized applications using Docker and orchestrated containerized applications using Kubernetes.
- Automated infrastructure provisioning and configuration management using Ansible.

Dairy classic ice creams pvt Ltd.

Position: Maintenance officer 03/2023 - 08/2024

- Conducted regular inspections and preventative maintenance on equipment machinery.
- Monitored supplies and tools, ensuring availability of essential items ordered new parts and equipment as needed to avoid delays in maintenance.
- Maintained detailed logs of maintenance activities, repairs performed, and parts used.
- Followed safety guidelines and protocols to maintain a safe work environment, using personal protective equipment (PPE).

PROJECT EXECUTED

Deployment of Django Notes App in Docker Containers with CI/CD Pipeline - Jenkins

- Implemented continuous integration and continuous deployment pipeline for a Django notes application.
- Implemented secure practices by incorporating variables for username and password during image push to Docker Hub, ensuring confidentiality.
- Deployed the containerized Django application using port mapping to facilitate communication between the container and the host system.

Static Website Hosting and IAM Configuration on AWS

- Deployed and hosted a static website using AWS S3, configuring the bucket for website hosting with public access enabled for specific files.
- Implemented IAM (Identity and Access Management) by creating two users with distinct permissions.
- User 1: Granted full access to S3 for managing objects and bucket policies.
- User 2: Restricted access to read-only permissions for viewing bucket contents.
- Created and assigned an IAM Role to securely manage access to other AWS services based on the principle of least privilege.

EDUCATION

Bachelor of Engineering
Electrical and Electronics Engineering (VTU)
(2019-2022)

SKILLS

- Languages & Tools: YAML, Linux, Git, Jenkins, Docker, Kubernetes, Ansible.
- Cloud Technologies: AWS (Amazon Web Services)
- AWS Services: VPC, EC2, IAM, ASG, ELB, S3, RDS.
- Containerization & Orchestration: Docker, Kubernetes.
- CI/CD Tools: Jenkins, Git.
- Configuration Management: Ansible.

CERTIFICATION

AWS certified Solution Architect
(Micro degree)

Devops Engineer
(Micro degree)

AWS and DevOps Internship
(MicroDegree)
