EDUCATION

2019-2022
ANDHRA UNIVERSITY

- Bachelors Of Science (computers)

SKILLS

- Swift
- Xcode
- Cocoa Touch
- MapKit
- UIKit
- Foundation
- Core Location
- Core Data
- Rest webservice
- MVC
- MVVM
- Alamofire
- JSON Parsing
- AV Kit
- Message UI
- Git

LANGUAGES

- English (Fluent)
- Telugu (Fluent)

PRO FILE

iOS developer with 2.2 years experience in building high-quality apps using Swift and Cocoa Touch in iOS frameworks like MapKit, Core Data, and Core Location. Adept at managing app modules with various controllers and delivering engaging user experiences. Committed to producing scalable and efficient solutions.

PROJ ECTS

Glentrees Academy -
Developer

- Contributed to a 3-person team in creating an iOS app that allows parents to monitor their child's academic performance, covering attendance, exams, fees, homework. and notifications.
- Designed and implemented user interfaces in accordance with Apple guidelines using Swift, UIKit, and CoreLocation.
- Integrated RESTful web services with JSON parsing for efficient data storage and retrieval.
- Employed CoreData for offline data management **answer** calendar functionality to display scheduled events.
- Managed dependencies and integrated third-party libraries using CocoaPods to enhance UI and app features.
- Resolved bugs throughout the development process and addressed application enhancement requests.
- Shared app builds with testing teams and clients via TestFlight.

Dolly Move & Delivery
Helping -
Developer

- Collaborated in a 3-member team to develop an iOS app connecting users with local moving and delivery professionals.
- Designed and implemented user interfaces using Swift, UIKit, and CoreLocation.
- Integrated web services with JSON parsing for dynamic data retrieval and implemented search functionality for extensive data records.
- Utilized Alamofire for API calls and integrated MapKit for location-based features.
- Developed a packing list feature allowing users to categorize and select goods.
- Implemented price estimation based on item lists and route distance, and incorporated Apple Push Notifications for delivery status updates.
- Conducted bug identification and resolution throughout the development process.
- Established offline data storage for user-selected items.

Teachmint-tuition

Developer

- Worked in a 3-member team to develop a comprehensive app for independent tuition and coaching teachers to manage classrooms digitally.
- Engaged in UI design and implemented code using Swift, UIKit, and CoreData.
- Integrated web services with JSON parsing for dynamic data retrieval.
- Developed camera functionality for photo capture and server uploads.
- Independently managed specific modules and implemented search logic for dynamic data.
- Handled dependencies through Cocoa Pods integration and resolved bugs at various stages
- Utilized TestFlight to share app builds with the testing team and clients.

Treebos-Booking

Developer

- Collaborated in a 3-member team to create a user-friendly app for booking budget hotels across 120+ cities, achieving over 4.5 ratings on platforms like TripAdvisor and MakeMyTrip.
- Engaged in UI design and implemented code in compliance with Apple standards using Swift and UIKit.
- Utilized Firebase Crashlytics to monitor and analyze application crash reports.
- Integrated RESTful web services with JSON parsing for efficient data storage and retrieval.
- Developed features to display city names and associated Treebo hotels, incorporating MapKit and CoreLocation for location-based functionalities.
- Implemented search logic to manage large datasets effectively and addressed application enhancement requests.
- Identified and resolved bugs throughout the development lifecycle.

My Recipes Box

Developer

- Contributed to a 4-member team to develop a digital cookbook app that simplifies recipe management for cooking enthusiasts.
- Engaged in UI design and implemented code according to Apple standards using Swift and UIKit.
- Integrated CocoaPods for dependency management and incorporated web services with JSON parsing for dynamic data retrieval.
- Developed search functionality for efficient recipe access and utilized CoreData for offline data storage.
- Managed the entire app's business logic and requirements, ensuring a smooth user experience.
- Identified and resolved bugs at various stages of development.
- Utilized TestFlight to distribute app builds to the testing team and clients.

Zostel - traveling

Developer

- Collaborated in a 4-member team to develop an app for Zostel, the largest backpacker hostel chain, offering diverse travel options across 70+ destinations in India.
- Engaged in UI design and implemented code adhering to Apple standards using Swift and UIKit.
- Integrated web services with JSON parsing for dynamic data retrieval and utilized Alamofire for API calls.
- Leveraged third-party libraries to enhance UI and functionality, and managed dependencies through Cocoa Pods.
- Independently handled specific modules and understood the app's business logic and requirements.
- Identified and resolved bugs throughout various stages of development.

Experience:

iOS Application Developer, Bangalore, Karnataka

Capgemini , September 2022-Present

- Developed and maintained native iOS applications using Swift within Xcode IDE, leveraging CocoaTouch and Interface Builder.
- Collaborated with cross-functional teams to define, design, develop, test, and deploy mobile applications.
- Wrote unit tests to ensure code quality prior to release cycles and utilized Git and SVN for source control management.
- Prepared project reports and correspondence regarding specifications, activities, and status updates.
- Designed user interfaces in collaboration with stakeholders to provide intuitive navigation and enhance user experience across platforms.
- Monitored app performance metrics, including CPU utilization and memory consumption.
- Proficient in Agile methodologies, participating in the full software development life cycle (SDLC) from requirements gathering to implementation.
- Wrote well-structured, testable code and configured push notifications for real-time updates.
- Debugged application issues across multiple device platforms and created custom views and controls for UI design.
- Implemented Apple's Human Interface Guidelines in all UI designs and developed apps that interact with web services via RESTful APIs and SOAP protocols.
- Optimized code for improved performance and memory usage.
