

Sarthak Bhardwaj

AI Engineer

A Research-to-Implementation Mindset: Ability to spearhead a project from ideation to deployment in production & strong record of AI based product development. Importantly, the ability to build and work with a team.

Skills

- Generative AI
- Data Science
- Data Structures
- Git/GitHub
- LangChain
- LlamaIndex
- Machine Learning
- Nest/Next JS
- OpenAI
- Prompt Engineering

Professional Experience

2024-08 -

Current

LLM Engineer Consultant

Metaverse Ventures Pvt Ltd, Hyderabad, India
(Remote)

- **Developed LLM-based Applications:** Hands-on experience creating back-end solutions using JavaScript, TypeScript, and frameworks like Nest.js and Next.js.
- **Optimizing LLMs & NLP Systems:** Designed, developed, and optimized large language models (LLMs), retrieval-augmented generation (RAG) systems, and NLP frameworks/tools, enhancing performance and scalability.
- **Audio/Video Transcription:** Implemented robust transcription methods for handling YouTube and file-based media using Bull queue management and integrated these with custom AI prompts for enhanced automation and accuracy.
- **AI Content Generation:** Developed and deployed a comprehensive library of AI prompts, generating automated content across platforms such as Instagram, LinkedIn, TikTok, Twitter, YouTube, Pinterest, and WordPress. This includes creation of posts, ads, educational quizzes, business insights, product descriptions, and sales emails.
- **Cloud Integration & Streaming:** Implemented real-time LLM responses using OpenAI stream handling, facilitating continuous content generation with streaming data, and enhancing scalability for SaaS applications.

- SpringBoot
- Typescript

2024-05 -
Current

GenAI Intern

Sunbase, Florida, Miami (Remote)

- Improved the intent classification model for greater accuracy.
- Implemented AI API node triggers and designed advanced data structures.
- Enhanced dialogue orchestration flow for seamless interactions.
- Developed RAG capabilities: chunking, embedding, tokenising, and retrieval for efficient data handling.
- Conducted extensive research for startup projects.

2024-04 -
2024-05

Data Scientist- AI Training

OutlierAI, Toronto, Canada (Remote)

- Streamlined data collection methods to minimize analysis errors.
- Conducted thorough exploratory data analyses for robust model building.
- Implemented advanced statistical techniques for accurate predictive modeling.
- Cleaned transformed, and analyzed large datasets to uncover hidden trends and patterns for actionable insights.

2024-01 -
2024-03

ML Intern

PiezoAI , Gurgaon (Remote)

- Developed custom algorithms to solve specific machine learning problems, enhancing overall project outcomes.
- Streamlined data preprocessing tasks for faster processing times and more efficient model training.

2023-05 -
Current

AI INTERN

HotShot.AI, Miami, Florida (Remote)

- Led development for Llama-index, adding features and versatile tools.
- Executed load testing on key API services: ADA, Babbage, and Curie.
- Enhanced a question-answering model with a custom citation engine for accurate information retrieval.

- Created a Text-to-SQL model for natural language to SQL conversion.
- Defined custom functions for chunks extraction, top-k retrieval, and similarity cutoff.
- Designed a grammar correction model for improved language accuracy.
- Researched CPU/GPU efficiency, server-less GPU architecture, and latency metrics across models.

Education

2001-04 -
2020-03

Intermediate: Non Medical

SD PUBLIC SCHOOL - Chandigarh

2024-09

B.E: Computer Science

Chitkara University - Rajpura, India

2019-04

High School Diploma

St. Anne's Convent School - Chandigarh, India

Accomplishments

- In the top 2% of coders in a Coding Aptitude test hosted on Superset at University level
- Co-founded a debating society - DebSoc
- Core Member of University Coders Association
- Secured Global Rank 489 (DIV-3 Codechef)
