Professional Summary

- Having 02 years of experience in SOC Monitoring, with security operations including Incident management through SIEM.
- Experience on working in 24x7 operations of SOC team, offering log monitoring, security information management.
- Monitoring security alerts and notifications from various sources including SIEM (Security Information and Event Management) systems, IDS/IPS (Intrusion Detection/Prevention Systems), and firewall logs to detect potential security incidents.
- Experience on **SIEM (Security Information and Event Management) tools like Microsoft Azure sentinel and Spelunk.**
- Responded to security incidents in a timely manner, coordinating with other teams as necessary to contain and mitigate potential threats to the organization's infrastructure and data and Performing the Malware analysis.
- Creating the tickets in ticketing tool.
- Working on Email security tools like **Phisher & Proof Point.**
- Working on the phishing emails and taking approximate actions on the Spam/threat mails.
- Worked with core teams to investigate the false and true positive alerts.
- Responsible for following all the steps in incident response process.
- Filling the Daily **health checklist.**
- Created **SOP RUNBOOKS** for various alerts.
- Preparing daily, weekly and monthly reports as per client requirements.
- Played a vital role in SOC team as L1 analyst worked with core teams to investigate the false and true positives.
- Experience in Malware & Phishing analysis.
- Performing deeper investigation with different tables in the Azure sentinel.

Tools and Technology

- **SOC** (Security Operation Center).
- **SIEM** (Security Information and Event Management) Tools: Azure Sentinel & Spelunk.
- **Email Security:** Phisher know bee & proof point.
- Experience in Incident Monitoring and incident response.
- Create, Modify and Update Security Information Event Management (SIEM) Tools.
- Certified NSE1 & NSE2, SC200.
- Attended training on Microsoft defender & Tenable Nesses.

Professional Experience

- Working as a Soc Analyst at **Wipro,Bengaluru** from August 2022 to till date.

Project Summary:

Environment : Azure Sentinel

Role : SOC Analyst

Roles and Responsibilities:

- Working on the **Microsoft Azure sentinel**, (console & web console) providing operations support at the Security Operations Center for different member firms.
- Experience on Office365 into email gateway security to overcome phishing attacks
- Good experience in **SIEM tools like Microsoft Sentinel & Splunk**.
- Handling the complete incident management framework cycle right from incident identification, incident containment, performing root cause analysis, suggestion and implementation of preventive and corrective controls and perform network analysis as needed on a case-to-case basis.
- Monitoring and identify positive security events from **Microsoft Azure sentinel** dashboard, Orion during the shift hours and take necessary action for the critical events that is seen during each shift's hours with deviations for all the environments that we support.
- Analyzing Phishing and Spam related mails using header analysis, Body analysis using various tools and block them in O365.
- Preparing daily and weekly dashboard on the security threats.
- Use the escalation process for multiple users impacting incidents all the time and keep update the management about the progress of incident.
- Will document the tickets fully with all the action taken for the incident and update it on frequent basis and maintain ticket quality by documenting it with all the required comments
- Understanding the incident based on to determine whether it's false or true positive.
- Troubleshooting SIEM dashboard issues when there are no reports getting generated or no data available.
- Determine the scope of security incident and its potential impact to Client network recommend steps to handle the security incident with all information and supporting evidence of security events.
- Monitoring and identify positive security events from **Microsoft Azure sentinel** dashboard, Orion during the shift hours and take necessary action for the critical events that is seen during each shift's hours with deviations for all the environments that we support.
- Analyzing Phishing and Spam related mails using header analysis, Body analysis using various tools and block them in O365.
- Preparing daily and weekly dashboard on the security threats.

- Responded to security incidents in a timely manner, coordinating with other teams as necessary to contain and mitigate potential threats to the organization's infrastructure and data and Performing the Malware analysis
- Contributed to the development and improvement of SOC processes and procedures, identifying areas for enhancement based on experience and industry best practices

Education

- *B.Com(Computers) from Acharaya Nagarjuna University.*
