PROFESSIONAL PROFILE

software developer with nearly two years of experience, skilled in .NETCORE Passionate about innovation, teamwork, and writing clean, efficient code for impactful projects. I am eager to explore more projects and work with wonderful organizations.

EXPERIENCE

Truckrr Information Services Private Limited - Chennai February 2023 - August 2024

Our software solution for transport-related productbased applications includes testing a stack of **.NET CORE, SQL, jQuery, AWS services, Agile methodology, Jira, GitHub, and Postman**

PROJECTS

1.Truckrr Web App

URL: <https://app.truckrr.com>

Description:Our platform connects transport owners with shippers, streamlining the logistics process through an efficient, user-friendly interface.

Owner Signup: Transport owners can easily register on the platform, creating a dedicated account to manage their fleet and operations. **Vehicle &**

Driver Registration: Once registered, owners can add detailed profiles for each of their vehicles and drivers, ensuring accurate and efficient tracking and assignment. **Trip Request:** Shippers can submit trip requests by specifying critical details like origin, destination, load type, and additional requirements. **Quotation Creation:** The platform automatically calculates estimated costs based on various factors, including fuel, tolls, and distance, and provides an accurate quotation for the trip. **Trip Assignment:** Transport owners can assign trips to specific drivers and vehicles within their fleet, ensuring the right match for each request. **Real-time Monitoring:**The transport manager can monitor the trip's progress through the web application.They can track the vehicle's location, speed, and any deviations from the planned route.System can also monitor the driver's behavior, such as speed limits and rest periods.

Language Used: .NetCore, JavaScript, React, SQL, HTML and CSS

Clients : Transporter, Fleetowners

Role : Junior software engineer

2.Truckrr Hero App

URL: <https://play.google.com/store/apps/details?id=com.truckrr.driverhero>

Description:Truckrr Hero connects drivers and transporters, simplifying transport needs with verified profiles, and digital contracts. **Driver**

Registration:Driver downloads and installs the Truckrr Hero app and creates an account by providing basic information . **Document**

Verification:Driver uploads required documents: driving license, Aadhar card, vehicle documents (RC book, insurance), and PAN card . **ULIP**

Verification:Driver's ULIP details are verified by the app. **Aadhar Verification:**Driver's Aadhar card is verified through eKYC or other secure methods.

Profile Completion:Driver completes their profile by providing additional details like vehicle type and capacity, experience, location, preferred routes, and availability. **Profile Verification:**Truckrr Hero team reviews the driver's profile and documents to ensure accuracy and compliance. Once verified, the driver's profile is activated and made visible to transporters. **Transport Needs Posting:**Transporter posts their transport needs on the app, specifying pickup and delivery locations, load type and weight, required vehicle type, delivery timeline, and budget. **Driver Search and**

Selection:Transporter can search for suitable drivers based on location, vehicle type, experience, and ratings and reviews. Transporters can directly contact shortlisted drivers to discuss rates and terms. **Hire Confirmation:**Once both parties agree on the terms, the transporter confirms the hire through the app, which generates a digital contract outlining the details of the transport job.

Language Used: C# API for mobile App

Clients : Driver's

Role : Junior software engineer

3.Truckrr Hub App

URL: <https://play.google.com/store/apps/details?id=com.truckrr.hub>

Description:The platform offers a comprehensive set of tools for both vehicle and driver verification. Users can check the status of a vehicle by entering its registration number to view key details like insurance validity, Pollution Under Control (PUC) certificate status, road tax payments, and any outstanding fines. This ensures the vehicle is compliant and roadworthy. **Vehicle**

Information:Easily check the current status of a vehicle by entering its registration number. This feature provides essential details like insurance validity to ensure compliance, Pollution Under Control (PUC) certificate status, and road tax payments. Additionally, users can view any outstanding fines associated with the vehicle, helping keep records up-to-date and avoid potential issues on the road. **Driver Information:**Verify a driver's license by simply entering their DL number. This feature offers information on the license's validity period, the driver's history on the road, and any endorsements or restrictions that might affect their driving. It helps maintain safety and compliance by allowing users to ensure that drivers are fully qualified and cleared to operate. **Nearby**

Services:Locate essential services such as petrol pumps and hospitals quickly, making it convenient for drivers during long or challenging journeys. This feature provides real-time access to nearby locations, helping drivers plan their trips more efficiently and access emergency services when needed. It enhances journey safety and comfort by ensuring help is always close at hand.

Clients : Transports, Drivers, Shippers, Brokers

Role: Junior software engineer

Language Used: C# Api For Mobileapp

4.Truckrr One App

URL: <https://play.google.com/store/apps/details?id=com.truckrr.truckrrone>

Description: Truckrr One is a mobile app that connects transport owners with shippers, offering an intuitive and efficient interface to manage logistics on the go. **Owner Signup:** Transport owners can quickly sign up on the Truckrr One mobile app, creating an account to manage their fleet and operations from anywhere. **Vehicle & Driver Registration:** Once registered, owners can add detailed profiles for each vehicle and driver, ensuring easy tracking and assignment directly from their mobile device. **Trip Request:** Shippers can submit trip requests using the app, providing essential details like origin, destination, load type, and additional requirements, all from their mobile. **Quotation Creation:** The app automatically calculates and generates trip quotations based on factors like fuel, tolls, and distance, providing an accurate estimate right on the mobile screen. **Trip Assignment:** Transport owners can assign trips to specific vehicles and drivers within their fleet, ensuring optimal matches for each request via the mobile app. **Real-time Monitoring:**The transport manager can monitor the trip's progress through the web application.They can track the vehicle's location, speed, and any deviations from the planned route.System can also monitor the driver's behavior, such as speed limits and rest periods.
