

Professional Experience:

Key Skills:

- **Manual and Automation Testing:** Extensive experience in testing Web and Mobile applications using various testing methodologies and tools.
- **Selenium WebDriver:** Expert in creating and maintaining test scripts with a Page Object Model (POM) Hybrid framework for both Web and Mobile applications.
- **Automation Frameworks:** Developed TDD Automation Frameworks using Python, Robot, Maven, and TestNG. Proficient in utilizing Selenium and Appium tools.
- **Appium:** Skilled in automating Mobile applications on Android and iOS platforms.
- **CI/CD and Source Code Management:** Experience with Jenkins for CI/CD, and proficient in managing source code with Git and Maven.
- **Database Testing:** Basic knowledge of SQL for executing queries.
- **Test Strategies and Planning:** Adept at designing Test Strategies, Test Plans, and Test Cases, with extensive experience in Functional, Smoke, and Regression Testing.
- **Testing Life Cycles:** Solid understanding of SDLC, STLC, and Bug Life Cycle.
- **Domain Experience:** Gained experience in diverse domains such as Travel and Ecommerce.

Experience Highlights:

- **Selenium and Appium Automation:** Developed robust test automation frameworks with Selenium WebDriver and Appium, applying the Page Object Model and Data-Driven/Behavior-Driven methodologies.
- **Framework Development:** Created and enhanced automation frameworks in Robot framework, integrating Data-Driven and Behavior-Driven models for effective testing.
- **Defect Tracking and Reporting:** Actively involved in test execution and defect tracking, with a track record of resolving high-priority issues during the Test Life Cycle.
- **Collaborative Work:** Engaged in status meetings with clients, managers, and stakeholders, ensuring alignment and addressing critical issues promptly.

Technical Expertise:

- **Languages:** Python, Java
- **Tools:** Selenium WebDriver, Appium, Git, Maven
- **Testing:** Functional Testing, Smoke Testing, Regression Testing, Black Box Testing
- **Databases:** Basic SQL

Professional Development:

- **Test Automation Frameworks:** Experience in developing frameworks using RobotFramework, incorporating TDD and BDD approaches.
- **Communication and Collaboration:** Effectively communicated and collaborated with cross-functional teams to drive quality improvements and address project challenges.

Technical skills:

Automation Tool	:	Selenium and Appium
Automation Frameworks	:	POM, Data driven and RobotFramework
Test & Defect Tracking Tool	:	JIRA
Programming Language	:	Python, Core Java
DBMS	:	SQL
API	:	POSTMAN
CI / CD Tool	:	Aws

Employer Details:

- Working as Software Test Engineer with **TCS(Client) Arcticetrn solution private limited (Payroll)**, **Bangalore** from May 2022 to till Oct 2024.

Project Details:

Project-1:

Client	:	Berfat Deals
Payroll	:	Arcticetrn solution PVT LTD
Testing Methodologies	:	Manual Testing, Automation Testing
Tools	:	Selenium / Appium
Team Size	:	15
Duration	:	July 2022 to Present

Description:

- **Overview:** This project is a web-based application which is designed for Customer's ease, where they can buy and sell old and new products from Online. This application is a platform which acts like a bridge between consumer and supplier. Based on the product description they used to communicate one another.
- **Technologies and Tools Used:** Utilized Python-based frameworks for testing (e.g., Robot), Selenium WebDriver for UI testing. Employed statistical analysis for Marketing Manager statistics and monitored cross-platform compatibility.

Roles & Responsibilities:

- Analyzed requirements outlined in Business Requirement Documents (PRDs).
- Tested Android and iOS mobile applications using real devices and simulators.
- Designed and executed test scenarios and test cases based on requirements.
- Conducted Functionality, Integration, and Regression testing.
- Performed Compatibility testing across various browsers and operating systems.
- Developed business functions based on test cases using descriptive programming.
- Executed test scripts in Selenium and Appium for both manual and automated regression testing, and analyzed test results.
- Collaborated with developers to resolve software defects.
- Used adb tool and XCode to check debug logs.
- Prepared automation scripts using Selenium WebDriver.
- Implemented TestNG test automation framework and developed automation infrastructure.
- Created automation scripts using element locators and Selenium WebDriver methods.
- Performed back-end validations using SQL.
- Coordinated with the Test Lead and Development Team for bug fixing.
- Analyzed test results and reported findings.
- Participated in Agile meetings.

Education Details:

- KLE Societies of BCA college Karnataka University Dharwad (2019-2022)

Place: Bangalore

Name: Vaishnavi M
