CAREER OBJECTIVE

Aspiring for a promising and motivating career in a renowned organization which provides an opportunity to enhance my knowledge & skills and work towards organization and individual growth

ACADEMIC QUALIFICATION

Qualification	School/College	Board/University	Year	Percentage/ CGPA
M Tech (Digital Communication)	RV College of Engineering	VTU	2023	8.48/10
B.E (Electronics and Communication Engineering)	Rajiv Gandhi Institute of Technology, Bengaluru	VTU	2021	8.25/10
II PUC	Vision PU College	Karnataka Board of Pre-University Education	2017	63.33%
SSLC	Sri Saraswathi Vidyalaya H S	Karnataka Secondary Education Examination Board	2015	82.88%

TECHNICAL LANGUAGES/SKILLS

- Tools : MATLAB, Optisystem
- Programming Languages : C,C++,Python(Basics),OOPs Concept

PROJECTS

1}Title : Implementation of Machine Learning Algorithms to detect DoS attack in WSN

Role :Major Project(M Tech)

- What I have learnt: Implementing two Machine Learning algorithms CNN and XGBoost along with two preprocessing methods PCA and Normalization to form four combinations models and to check which algorithm detects the malware attacks (Denial of Service) to secure network. A light weight and effective model XGBoost gave greater accuracy with less training time compared to other methods in intrusion detection.

2} Title : Smart Communication Device for Deaf, Dumb and Blind with Object Recognition

Role :Major Project(B.E)

- What I have learnt: This model is completely developed for the independency of vocally, hearing and visually impaired people. It works on raspberry pi with a pi camera mounted on it. The devised system will also provide efficient way of commutation between impaired people among themselves and with the normal people.

3} Title : Performance Analysis of WDM MIMO in Free Space Optics in different atmospheric conditions

Role :Minor Project(M Tech)

- What I have learnt: Designing of WDM MIMO FSO systems using optisystem software and comparing them at different atmospheric conditions along different ranges and channels.

INTERNSHIP PROGRAM

1} Company Name : Powertronics

Duration : 17-Mar-2021 to 17-April-2021

Title : Design and development of SCR Characteristics Circuit

- Learnings : The design of an SCR characteristics circuit was done to create a setup to analyze the behavior of an SCR under different operating conditions like on state and off state.

2} Company Name : Cognitive Solution

Duration : 17-Aug-2020 to 17-Sep-2020

Title : SMS Spam detection using Machine learning with python

- Learnings : This work was designed with the application of machine learning algorithm like naïve bayes for SMS spam detection. A model was trained to learn to discriminate between ham/spam automatically and to later classify as ham and spam messages.

ACHIEVEMENTS AND EXTRA CURRICULAR ACTIVITIES

- Published paper on “Implementation of Machine Learning Algorithms to detect DoS attack in WSN” at 5th International Conference on Circuits, Control, Communication and Computing-2024
- Participated in “Tech-Geeks an Artificial Intelligence and Machine Learning” workshop
- Participated in the Scientific talk on Extraterrestrial Intelligence by Tesla, RGIT
- Certification for participating in Level 1 training under project on cyber security eSaksham.

INTERPERSONAL SKILL

- ❖ Good communication skills
- ❖ Listening Skills
- ❖ Multitasking
- ❖ Positive Attitude & Team Work
- ❖ Quick Learner

PERSONAL DETAILS

- ❖ Date of Birth :- 24-02-1999
- ❖ Father's Name :- Shankarappa N
- ❖ Language Known :- English, Kannada, Hindi and Telugu
- ❖ Address :- Veerannapalya, Bangalore-560045

DECLARATION

I do hereby declare that the above information is true to the best of my knowledge.

Place: Bengaluru
Date:
