

ETL DEVELOPER

Vamsikrishna V

Email:vamsikrishnavemula20@gmail.com

Mobile: +91 9966940304

PROFESSIONAL SUMMARY

- 4 years of experience in Microsoft BI technologies.
- Azure Cloud Expertise: Hands-on experience in cloud data migration and building pipelines in Azure. Skilled in leveraging Azure Data Factory, Azure SQL Database, and other cloud-native tools to streamline data migration, integration, and transformation processes.
- Azure DevOps: Experience in managing and tracking work items such as tasks, tickets, and PBIs (Product Backlog Items) within Agile and Scrum frameworks.
- Expertise in the Microsoft BI solution offerings including SQL Server databases and MSBI Stack (SSIS, SSRS).
- Expertise in T-SQL developing Views, Stored Procedures, User-Defined Functions, Complex Query development, Joins etc.
- Expertise in query optimization and performance tuning.
- Expertise in data acquisitions, archive recovery, and implementation of a database □ Worked Extensively on ETL process using SSIS package.
- Good Experience in maintenance and Administration of SQL Jobs, Alerts, SQL Mail Agent, and schedule SSIS Packages.
- Good Experience in providing Error Logging and Event handling for SSIS Packages using SMTP Configuration and Execute SQL task.
- Good experience in loading data from different types of json and Excel files.
- Designed Dashboards, Scorecards and reports using multiple KPI's and SSRS Reports.
- Configuring the data sources to schedule the data refresh using Power BI gateways.
- Worked on Power BI, SSRS and Advance Excel to develop multiple report models.
- Developed standard reports, parameterized reports, drill down, drill through and cascading and collaborating into final design of displaying into dashboards.
- Experience in Agile and Waterfall delivery models.

TECHNICAL SKILLS:

- **DBMS** : SQL Server, T-SQL, SQL Profiler
- **Technologies** : Microsoft Business Intelligence Tools (MSBI)
Azure Data Factory, Azure DevOps
- **Languages** : T-SQL, Azure SQL, Python Basics
- **ETL & Reporting Tools** : MSBI Stack - (SSIS, SSRS)
- **Advanced Reporting Tools** : Advanced Excel
- **Visualization Tools** : Power Bi
- **Operating Systems** : XP, Windows
- **Office Tools** : MS Office Suite

PROFESSIONAL EXPERIENCE

Organization	Duration	Responsibility
Datalink software	Sep 2023 to Oct 2024	Senior Data Engineer
Nexus software	Nov 2020 to Aug 2023	Senior Database Developer

Academic Details:

- Graduate in Bachelors of Technology from JNTU-K during 2020

Project 1:

Project Name: RockerBox

Domain: Financial HealthCare

Client: Payers, Hospital systems

Duration: Oct 2023 to till Date

Skills: Azure data factory, SQL Server, MSBI Stack (SSIS, SSRS, SSMS), TSQL, SQL Server Agent,

Project Description:

Rockerbox is a healthcare data integration and financial informatics, specifically designed for risk-bearing entities. It enables payers, managed care organizations, and providers to manage risk-bearing contracts by providing advanced analytics, financials, and value-based risk management. The platform supports Medicare Advantage, Medicaid, and Commercial lines of business, offering functionalities such as risk scoring, quality measures management, and financial insights

Roles and Responsibilities

- Hands-on experience in cloud data migration and building pipelines in Azure. Skilled in leveraging Azure Data Factory,
- Azure SQL Database, and other cloud-native tools to streamline data migration, integration, and transformation
- Create and modify tables, stored procedures, triggers, check constraints and functions. Create triggers to keep track of changes to the fields of tables when changes are made.
- Managed work items in Azure DevOps, including tickets, tasks, and PBIs, ensuring smooth progress tracking and collaboration across Agile teams.
- Designed and developed SSIS Packages to process data into Target System from Legacy source systems based on the population specs.
- Working on SQL Server Integration Services (SSIS) for transferring data from Heterogeneous Databases OLEDB sources.
- Used Event Handlers to handle errors and enabled logging along with email notification.
- Automated manual process with SQL Server Integration Services (SSIS) packages for importing data from various sources to destinations using various transformations.
- Used all the major Control flow tasks and Data Flow Transformation in SQL Server Integration Services (SSIS)
- Debugged Packages using break points.
- Created Jobs, SQL Mail Agent, Alerts and Scheduled SSIS Packages
- Optimize Queries and used SQL Profiler to identify the bottle necks in scripts.
- Develop and deliver dynamic reporting solutions using SQL Server Reporting Services (SSRS).
- Created various complex reports, Matrix and chart reports according to user specifications using SSRS.
- Worked on expressions to filter, group, parameterized, cascading parameter reports in SSRS.
- Develop reports using SQL Server Reporting Services and utilizing complex SQL queries and stored procedures. Configure and maintain Report Manager and Report Server for SSRS.

Project 2:

Project Name: SUNRx

Domain: HealthCare

Client: 340 B

Duration: Nov 2020 to Aug 2023

Skills: SQL Server, MSBI Stack (SSIS, SSRS, SSAS), TSQL, DAX, Power Bi, Advanced Excel

Project Description:

340B. Simplified. SUNRx is a healthcare technology company, providing comprehensive 340B administrative services to eligible healthcare facilities, delivering split billing solutions, contract pharmacy with referral claims capture functionality, plus the uninsured 340B discount prescription cash card with advanced sliding scale technology. SUNRx fully supports compliance around duplicate discounts (Medicaid) for all covered entities to maximize their savings, optimizing their 340B program to best serve their communities and partner with retail, chain, specialty and mail order pharmacies.

Roles and Responsibilities:

- Involved in requirement analysis as per the customer requirements.
- Responsible for development of ETL (Extract, Transform and Load) processes using SSIS and SQL DW for loading data.
- Developed various operational, Dashboard reports using SSRS
- Created Tables, Stored procedures, and defined functions.
- Extensively designed the packages and data mapping using Control flow task, Sequence container task, Dataflow Task, Execute SQL Task and Data conversion task in SSIS Designer.
- Enable dynamic logging of package run into a text file.
- Involved in designing, developing, and deploying data visualizations in SSRS.
- Create and modify tables, stored procedures, triggers, check constraints and functions. Create triggers to keep track of changes to the fields of tables when changes are made.
