Achievements

Optimized data pipelines, improving accessibility by 30% and reducing processing time by 25%. Automated workflows, increasing operational efficiency by 20%.

Languages

English, Telugu

Dynamic **Azure Data Engineer** with 2.5 years of experience in **designing and deploying** scalable data pipelines for **insurance and manufacturing projects** using **Azure Data Factory, Databricks, SQL, and Python**. Proven track record as an **innovative problem-solver**, achieving a **25% reduction in data processing time** and **increasing marketing effectiveness by 15%** through optimized data solutions.

Work History

2023-01 -2023-12	Data Engineer <i>TCS, Hyderabad</i> Designed and implemented a highly optimized Azure Data Factory (ADF) pipeline to ingest multi-source claims data into Azure Data Lake Storage (ADLS) Gen2, reducing execution time by 20% and improving data accessibility by 30%. Transformed raw claims data into actionable insights using Azure Synapse Analytics, optimizing query performance and achieving a 25% reduction in data processing time. Led a cross-functional team in leveraging Azure Databricks to conduct advanced analytics, segmenting customers into distinct groups for targeted policy offerings, and increasing marketing ROI by 15%. Collaborated with stakeholders and clients to ensure seamless integration of data pipelines with existing systems, addressing their specific analytics requirements. - Spearheaded efforts to optimize customer segmentation strategies, reducing churn rates by 10% through data-driven insights.
2021-08 - 2022-12	Data Engineer <i>TCS, Chennai</i> Extracted and integrated data from diverse sources, including MS SQL Server, manual files, and Blob Storage, enabling seamless data availability for analytics teams. - Ensured robust data management with a deep understanding of storing and reading data from Azure Blob Storage, adhering to best practices for cloud storage management. Collaborated in Agile teams, participating in sprint planning, daily stand-ups, and retrospectives, while ensuring tasks were completed within deadlines. Managed deployment pipelines and version control using Git, enabling streamlined updates and rollback capabilities. - Proactively monitored, tested, and troubleshoot ADF pipelines and Databricks jobs to maintain high performance and address data quality issues.
