EDUCATION

MASTER OF COMPUTER APPLICATIONS
SRI VENKATESWARA UNIVERSITY
Oct 2023 | Tirupati, Andhra Pradesh
CGPA : 8.2

BACHELOR OF SCIENCE
SRI VENKATESWARA DEGREE
COLLEGE
Sept 2020 | Anantapur, Andhra Pradesh
CGPA : 8.5

BOARD OF SECONDARY EDUCATION
ANANTHA VIDYANIKETHAN
May 2015 | Anantapur, Andhra Pradesh
CGPA : 9.2

TECHNICAL SKILLS

Technologies :

- Robotic Process Automation

Tools :

- UiPath
- UiPath Studio
- UiPath Orchestrator

Web Technologies :

- HTML
- CSS

Programming Languages :

- C Sharp

DataBase :

- SQL

CERTIFICATES

Certificate in RPA UiPath
Certificate in HTML
Certificate in CSS
Certificate in SQL
Certificate in C Sharp

HOBBIES

Learning New Technologies
Listening to music
Travelling
Gardening

PROFILE SUMMARY

- Experienced RPA Developer with a strong focus on UiPath, proficient in designing and implementing automation solutions using ReFramework.
- Skilled in integrating UiPath with various applications, utilizing activities for Excel automation, PDF processing, and data manipulation.
- Adept at managing workflows in UiPath Studio, with a solid understanding of error handling techniques and exception management.
- Familiar with UiPath Orchestrator for managing robots, monitoring performance, and optimizing automation processes.
- Committed to driving digital transformation through effective automation strategies that enhance operational efficiency and productivity.
- Acquired knowledge of advanced concepts in RPA, including regex and basics of document understanding, to enhance automation capabilities.

EXPERIENCE

QUBICGEN | RPA DEVELOPER

Feb/2024 - Present | Anantapur, AP

- Engaged in end-to-end development of automation solutions using UiPath, focusing on identifying automation opportunities to enhance process efficiency.
- Contributed to multiple automation projects, enhancing operational efficiency through:
 - Web Automation: Designed automated workflows to streamline tasks such as form filling, data extraction, and web application testing.
 - Email Automation: Implemented automated solutions for email management, including criteria-based responses, organization, and bulk email handling.
 - Excel Automation: Developed processes to automate data entry, manipulation, report generation, and chart creation in Excel, significantly reducing manual workload.
 - PDF Automation: Created automated tasks for handling PDF documents, including text extraction, merging/splitting, and form filling, improving document processing efficiency.
- Gained hands-on experience with UiPath Orchestrator, managing and monitoring robotic processes to optimize performance and ensure seamless automation operations.

PROJECTS

CIM DOCUMENT UPLOADING

- Developed a bot responsible for uploading documents to the customer application, CIM, which is an SAP application. The process involves uploading files into SAP, where the business places all files in a designated folder and provides an input sheet. The bot reads the input sheet to retrieve the necessary details, including the file names that need to be updated. Each row in the input sheet corresponds to a file that must be uploaded to the CIM application. Prior to uploading, the bot retrieves the document and performs the upload to CIM.

COUNTRY By COUNTRY REPORTING

- It is developed to collect the tax documents from different teams within the organization automatically every year. Where bot will be sending the reminders to submit the documents and user will be replying to that reminder email attaching the document and this document is validated with some business rules and uploaded to a CIM application which is a web based application.
- This project helps to track the documents for each company.
