TECHNICAL SUMMARY

A motivated and enthusiastic fresher seeking a role to enhance and explore my technical knowledge. Strong communication skills and a high level of commitment to responsibilities. Quick to adapt and eager to learn in a professional work environment.

TECHNICAL SKILLS

- **Backend:** Java, JEE, JSP, Hibernate, Spring Boot
 - **Frontend:** HTML5, CSS, JavaScript
 - **Database:** SQL
-

EDUCATION

- **Bachelor of Technology** in Electronics and Communication Engineering
VEMU Institute of Technology, Chittoor (2019-2023)
CGPA: 7.33/10
 - **Intermediate (Junior College)**
Sri Padmavathi Women's Junior College, Tirupati (2017-2019)
CGPA: 8.73/10
 - **SSC (High School)**
S P V B High School, Mulakalacheruvu (2017)
CGPA: 9.0/10
-

PROJECT 1:

Power Optimization of Single-Phase Clocked Feedback D-Flip Flop

Client: Academic Research

Tools: Micro Wind, DSCH

Role: VLSI Designer

Project Description:

This project focused on optimizing the power consumption of a single-phase clocked D-flip-flop by reframing the number of transistors. The detailed comparison included analyzing power consumption and delay characteristics for various configurations to achieve optimal performance.

Responsibilities:

- Involved in the entire design and simulation cycle of the D-flip-flop.
 - Interacted with peers and academic guides to understand VLSI design constraints and optimizations.
 - Attended project meetings to discuss progress and receive feedback.
 - Understood design requirements and carried out impact analysis on power consumption and delay.
 - Analyzed different transistor configurations to optimize power and performance.
 - Developed test cases and simulations to measure power consumption and delay.
 - Debugged design issues and fine-tuned the transistor count to meet project goals.
 - Conducted detailed comparisons of the design with industry standards for validation.
-

PROJECT 2:

E-Commerce Full Stack Web Application

Client: Personal/Academic Project

Technologies Used: Java SE, Java EE (Servlets & JSP)

Role: Full Stack Developer

Project Description:

The aim of this project was to build an e-commerce web application that facilitates online buying and selling of products or services. It incorporated key features such as a product catalog, shopping cart, payment gateway integration, order management, user accounts, and customer support.

Responsibilities:

- Involved in the full stack development lifecycle of the web application.
- Collaborated with team members to understand client requirements for the e-commerce platform.
- Attended scrum meetings to align progress with project timelines.
- Designed and developed the product catalog, shopping cart, and order management modules using Java EE technologies.
- Integrated payment gateways and ensured secure transaction processing.
- Debugged and tested different functionalities to ensure smooth user interaction.
- Performed unit testing and resolved any issues to ensure the stability of the application.
- Deployed the final application and documented the process for future reference.

CERTIFICATIONS

- **Full Stack Web Development** from TAP Academy (May 2023 - Oct 2023)
- **Web Development Course 2.0** from Infosys

INTERNSHIPS/TRAINING

- **Internship:** 1-month internship on "FPGA Design and Verification" at Tech Fluent Solutions Pvt. Ltd., Hyderabad.
- **Training:** 6-months training on "Full Stack Web Development" from TAP Academy, Bangalore.

DECLARATION

I hereby declare that the above information is true to the best of my knowledge and belief.
