

EDUCATION

KIET GROUP OF INSTITUTION, AKTU

Bachelor of Technology/Engineering
2018 – 2022

SKILLS

Cloud Computing Platforms

- **Microsoft Azure:** Extensive knowledge and 2 years of experience working with a wide range of Azure resources.
- **Amazon Web Services (AWS):** In-depth knowledge and 3 years of experience with numerous AWS services.
- **Cloud Architecture:** Collaborated with core architecture teams to design and implement infrastructure on Azure and AWS.

CI/CD Tools

- Azure DevOps Server: Managed CI/CD pipelines and build/release processes.
- Jenkins: Developed and maintained automated build and deployment pipelines.
- SonarQube: Integrated code quality and security analysis.
- GitLab CI/CD: Configured pipelines for automated testing and deployment.

Coding & Scripting

- Languages: Java (Core), JavaScript, HTML
- Automation Tools: Cypress
- Scripting & Configuration: Bash, Azure CLI, PowerShell, ARM Templates, Bicep, YAML, Python

Monitoring and Logging Tools Prometheus, Grafana

Containerization and Orchestration Docker, Kubernetes

Infrastructure as Code Terraform, ARM, Bicep

Configuration Management Tools Ansible, Puppet

Databases SQL & MYSQL

SOFTWARE PACKAGES Vscode, Notepad++, Sublime, Eclipse,MySQLWorkbench,GitHub,KeyCloak(Oauth,openID)

OS Windows, Linux, Mac

PROFESSIONAL EXPERIENCE

DevOps & Cloud Software Engineer

Capgemini | 2022 - Present

- Demonstrated expertise in cloud computing through obtaining **certifications** in **Azure** and **AWS**, showcasing comprehensive knowledge in the field.
- Successfully served as a Cloud Infrastructure Engineer, ensuring the seamless functionality of applications and implementing and managing a **DevOps approach** for projects.
- Responsible for day-to-day operational issues related to business transformation applications. Managed releases and deployments for frontend and backend teams, ensuring services performed within benchmarked limits. Oversaw **security** postures, analyzed deviation metrics, and focused on continuous improvement to maintain a **stable backend** ecosystem.
- **Designed** and **implemented infrastructure** on Azure Cloud platforms, utilizing services such as Virtual Machines, Azure Active Directory, Azure Blob Storage, Azure Kubernetes Service (AKS), Azure SQL Database, Azure Virtual Network, Azure Load Balancer, Azure Functions, Azure Logic Apps, Azure Monitor, Azure Application Insights, Azure Key Vault, Azure App Service, Azure DevOps, Azure Application Gateway, ARM Templates, Azure Synapse Analytics, Azure Data Factory, and Azure Data Lake.
- Built and maintained various **CI/CD pipelines** using **Azure DevOps Services** and **Jenkins** for builds, static code analysis, code coverage, vulnerability scans, unit testing, and deploying to non-production and production environments.
- **Provisioned infrastructure using Terraform** and wrote **Ansible** playbooks to set up and install tools and configure files on web servers.
- Key contributor in setting up a monitoring/alerting ecosystem for all services and health using Azure Resources, **Prometheus**, and **Grafana**.
- Managed **certificate management** for various internal applications.
- Spearheaded the development of a Health Check feature using **Cypress** (a frontend **automation tool** and open-source JavaScript framework), resulting in a significant increase in efficiency and accuracy.
- Leveraged frontend technologies like React JS, React Native, and Node JS to enhance various features of applications.
- Proactively **addressed client communications** and resolved technical issues related to networking, cloud computing, and frontend and backend bugs.
- Meticulously managed user access to applications, ensuring strict adherence to security protocols using B2C tools like **Keycloak**.
- Created **API gateway architecture** for the DAN application.
- Used IAM in AWS to provide identity and access management to users and created security groups to restrict internet access and secure EC2 instances and RDS instances using VPC in AWS.
- Consistently **delivered quality results** and demonstrated reliability in completing tasks.

CERTIFICATIONS

- Microsoft**
- Microsoft Certified Azure AZ-900
 - **Microsoft Certified Azure Administrator AZ-104**
 - **Microsoft Certified DevOps Expert AZ-400**
 - **Microsoft Certified Azure Developer Associate AZ-204**

HashiCorp Certified: **Terraform Associate**

Capgemini: **XTRAMILE AWARD** received from Capgemini .

- Udemy:**
- **Amazon Web Services Cloud Practitioner**
 - Microsoft Certified: Azure Administrator Associate
 - Cypress ; Web Automation
 - AZ-900 Microsoft Azure Fundamentals
 - **Java** Certificate
 - **DevOps Certificate** Azure DevOps Certificate
 - NPTEL - ENHANCEMENT SOFT SKILL AND PERSONALITY
 - **Terraform** Expert
 - **Docker And Kubernetes** Developer
 - Ansible & Puppet
