I am eager to apply my language and soft skills, along with my technical training, in roles that contribute to the company's growth. I am excited to take on opportunities that allow me to explore different facets of the software field and fully realize my potential.

Experience

- **VR/AR Developer** **SimInsights** *April 2023 - Present*
 - Understanding the Problem: Analyze project requirements for clear goals.
 - Detailed Work Plan: Structure a comprehensive project timeline with allocated resources.
 - Assets Master & Script: Organize resources and create a simulation script with version control.
 - HyperSkill Simulations: Develop interactive desktop and web simulations, ensuring seamless integration.
 - Leading Multiplayer Testing: Oversee team in multiplayer testing, gather feedback, and iterate as needed.

Education

- **Bachelor of Engineering** **2018-2022 Tumakuru**
Sri Siddhartha Institute of Technology

Project

1. Bank Account Management System: Models bank operations like deposit, withdrawal, and interest calculation using OOP concepts like inheritance and encapsulation.
2. Student Management System: Manages students and teachers, demonstrating inheritance and polymorphism to handle different types of people with shared properties.
Android SDK

Licenses & certifications

- **Java Full Stack Developer** - [Link](#)
