## Summary

Tech enthusiast with a foundation in Electronics and Telecommunication, specializing in AI and ML. Experienced in data analysis, machine learning, and market research through various internships and projects. Passionate about emerging tech like blockchain and crypto, and problem-solving—whether coding or a Sudoku puzzle. Beyond tech, I enjoy cooking and am dedicated to social service, having led an NSS volunteer team for 240+ hours. Recently completed a Software Developer Internship at BGOS Consulting Services, focusing on in-depth sector analysis and investment insights.

## Experience

### BGOS Consulting Services

May 2024 – September 2024

Software developer/ Intern

- Conducted in-depth analysis of over 85 sectors in the Indian stock market to identify top-performing sectors, utilizing platforms like Screener for data entry and Excel for preprocessing.
- Selected and monitored the top 10 sectors with the highest returns, including Banks, Finance, IT-Software, and Petroleum, providing daily stock analysis to inform investment strategies.

### ACMEGRADE

May 2023 – July 2023

ML Intern

Internship

- Conducted data analysis on multiple datasets.
- Developed and implemented algorithms on machine learning models using Python.

### Assignment Helper

May 2022 – Till Now

Case Study Analyst

Freelancing

- Solved and delivered more than 300+ projects of Australian management students.
- Conducted research and analysis to develop solutions.
- Prepared comprehensive reports, charts, and tables based on case study requirements.

## Projects

DENTALNET | Python, Node.js, Google Colab, TensorFlow, keras, Matplotlib, Tflite

Oct 2023-- Mar 2024

- Developed an AI-powered dental health diagnostic tool using convolutional neural networks (CNN) to identify five common dental conditions from RGB images.
- Utilized TensorFlow and Keras to construct a CNN architecture with layers optimized for efficient feature extraction and accurate multi-class classification.
- Implemented a user-friendly web platform combining FastAPI and ReactJS, enabling swift image processing and easy mobile device image uploads.

WHATSAPP CHAT ANALYZER | Python, Pandas, Heroku, Regular Expression, Streamlit, Python libraries

May 2024

- Developed a web application for analyzing and visualizing WhatsApp chat details, deployed on Heroku for accessibility.
- Preprocessed text data using regular expressions and conducted comprehensive data analysis, including message counts, word counts, media messages, and shared links.
- Implemented Python code with Pandas for data analysis and visualization, utilizing techniques such as pie charts and heatmaps to derive insights from chat data.

PIZZAHUT SALES ANALYSIS | MYSQL

Feb 2024

- Developed SQL projects for analyzing pizza sales data, including creating databases, importing tables, and performing comprehensive data analysis such as total orders, top-ordered pizzas, and order quantities.
- Conducted advanced SQL analyses involving table joins, categorizing orders by date, calculating average daily orders, and detailed revenue analysis including top-selling pizzas and revenue distribution.

---

## Technical Skills

**Languages:** Python, MySQL, HTML, CSS

**Frameworks/Libraries:** Numpy, Pandas, Matplotlib, Scipy, Tensorflow, Keras, FastAPI

**Others:** Data Analytics, Statistics, Machine Learning, Big Data, Kafka

**Computer Fundamentals:** DBMS, Data Visualization Tools, Data Pipelines and ETL tools, Computer Network

---

## Education

### VIDYALANKAR INSTITUTE OF TECHNOLOGY

**June 2020 – May 2024**

*Bachelor of Technology in Electronics and Telecommunication with Honors in AIML*

*CGPA - 8.84*

### SMT. CHM COLLEGE

**June 2018 – March 2020**

*HSC - PCM*

*Agg. 80.61%*

### MODEL ENGLISH HIGH SCHOOL

**June 2009 – March 2018**

*SSC*

*Agg. 85.80%*

---

## Courses Done

### Data Science for Engineers - NPTEL – 8 Week Course (Marks – 48%)

- Learned various statistical approach required for Data science, Mathematical concepts and applied statistics taught

### Data Science masters 2.0 – PW Skills – 450+ hours

- Covered topics mostly of each sub-domain of data science such as Analytics, Statistics, DL, NLP, Visualization and more is covered in the Course.
  - Hands on Experience on Solving Various ML Algorithms.
- 

## Achievements

- NSS Volunteer Certificate- Completed 240+ Hours in Social service- Lead of 10 students during the 2<sup>nd</sup> year
