Professional Summary

Highly motivated and skilled .NET web application developer with 3 years of experience in designing and developing innovative software solutions. Proficient in the .NET framework, SQL Server, Web API, and REST API. Strong knowledge of Object-Oriented Programming (OOP) concepts. Able to work independently and collaborate effectively with teams while meeting project deadlines. Experienced in identifying and resolving complex technical issues.

Work Experience

Technoforte Software Pvt. Ltd. (<https://www.technoforte.co.in/>)

Project - PALMS™ Smart Warehouse Management System provides configurable Supply Chain processes required by companies to provide better customer service and control operational costs.

Role: Associate Software Engineer

October 2023 – Present

- Implemented SSO Token-Based Authentication in PALMS using OpenID Connect and Azure App Registration. This implementation streamlined user access and enhanced security protocols.

Technology:

- Backend:** ASP.NET, **Frontend:** GWT(Google Webtool Kit)
- Authentication:** OpenID Connect.
- Cloud Services:** Azure App Registration.

Description:

- Single Sign-On Implementation:** Enabled users to authenticate once to gain access to the PALMS application and other integrated applications without the need for repeated logins.
- OpenID Connect:** Utilized OpenID Connect, which builds on OAuth 2.0, to securely handle authentication and authorization processes.
- Azure App Registration:** Registered the PALMS application within Azure Active Directory (Azure AD) to manage authentication. This included setting up the necessary permissions and configurations to ensure secure token issuance and validation.
- Token Management:** Implemented a robust system for managing tokens, ensuring secure storage, validation, and renewal processes. This involved handling access tokens, refresh tokens, and ID tokens to maintain user sessions securely.
- GWT** : Completely redesigned the UI for SSO. Once authentication is completed, a success message is displayed, and the user is redirected to the PALMS application.

Integration with PALMS Application:

- Integrated the SSO authentication mechanism directly into the PALMS application.
- And UI design has changed as per the client requirement.
- Modified the PALMS login flow to redirect users to Azure AD for authentication and handle the returned tokens for session management.
- Customized Production Control Management System (**SSPCS**) for **Toyota**.

Technologies: C#, SQL, Xamarin, MVVM Architecture, GWT.

Responsibilities:

- Developed and implemented the SSPCS (Specialized System for Production Control and Scheduling) project, a customized production control management system for **Toyota**.
- Employed Xamarin to create a cross-platform mobile application, providing users with seamless access to production control tools on various devices. Applied the MVVM (Model-View-View Model).
- Collaborated with **Toyota's** engineering and production teams to gather requirements, understand workflow, and tailor the system to meet specific needs.
- Conducted thorough testing, debugging, and performance tuning to ensure the system met Toyota's high standards for reliability and efficiency.
- Went to client location to understand the client's issues to identify and resolve several critical issues faced by **Toyota**. Immediate solutions were provided, significantly improving system performance and user satisfaction.
- End to end application developed using ASP.net as background and GWT as front end.
- Worked on user story implementations and project architecture level code template design.
- Good exposure on understanding user stories, acceptance criteria and impact analysis.
- Supported clients to understand the application and resolved queries.
- Worked in a scrum team.
- Supported full SDLC through design, development, Unit testing, internal and client bug fixes.
- Transformed client requirements to finished features and supported same in UAT and Production Process.

Role: Junior Software Engineer

January 2022 – Sept 2023

- Developed new user stories implementation in PALMS. **Rest API Documentation**
Developed comprehensive REST API documentation using a combination of C#, HTML, CSS, JavaScript, and jQuery.
- Integration of REST API With CSV File Storage in Azure Blob Storage.
- **Custom Fields** Implementation and **File Attachment** Implementation its new Features in PALMS.
- PALMS Screen Deprecation project for product customization.
- Worked on High/Medium low bugs.

Skills and learnings

- Good hold on application development using C#, ASP.net, .net core, Web API, SQL Server, Entity Framework and MVC and MVVM Architecture, Html, CSS, jQuery.
- Strong experience in new development and enhancement work.
- Sound knowledge of Object-Oriented programming, analysis and design.
- Designed standalone application on .net.
- Good understanding of SQL queries, views and stored procedure, creating database queries.
- Problem-solving and conflict resolution capabilities.
- Hands on experience in Visual Studio, Eclipse
- Leadership & Quick Learner
- Web Services
- Azure blob Storage and Azure App Registration.
- Coding and Problem Solving.
- API Testing & Development: Postman, Swagger
- Network Monitoring & Debugging: Fiddler
- API Documentation.

Education

- B.E in Mechanical Engineering. (2016 - 2020)
Adhiyamaan College of Engineering and Technology, Hosur - 7.8 (CGPA).
- Intermediate (2014 - 2016)
St. Joseph Higher Secondary, Hosur - 65 %.
- Matriculation. (2014)
St. Joseph's , Hosur - 8.0 (CGPA).

Language

- English
- Kannada
- Tamil

Declaration

I hereby declare that the details provided above are accurate to the best of my understanding.
