VB

SUMMARY

I am an BE graduate with 3.5 years of IT experience as a developer. I have honed my skills in software development, testing, and debugging, with an extensive knowledge of AWS cloud services. My experience encompasses working with application programming in C and C++, and I am adept at Python scripting. I thrive on challenges that require analytical thinking and problem-solving abilities.

EXPERIENCE

Software Engineer

Fiery Digital Imaging India Pvt Ltd

📅 03/2020 - 01/1970 📍 Bengaluru, India

A company focused on digital imaging technologies.

- Currently working on Fiery DFE's, developing feature requests and enhancing performance.
- Independently implemented major features for product enhancement and performance improvements.
- Hands-on experience in C and C++ application programming and debugging.
- Experienced in Python scripting, GitLab.
- Good knowledge of Linux internals.
- Independently implemented major features for product enhancement and performance improvements.
- Successfully managed time-sensitive releases and ensured customer satisfaction through consistent and reliable delivery.

EDUCATION

BE

Rural Engineering College

📅 08/2016 - 05/2020 📍 Gadag, India

KEY ACHIEVEMENTS

Full Product Development

Successfully contributed to the full product development life cycle at Fiery Digital Imaging.

SKILLS

AWS	aws cli	AWS Cloud	BitBucket		
Buffer	Cloud Services		Debugging		
Docker	EC2	ELB	Git	Github	
Gitlab	I2C	IAM	JIRA	Linux	
Clearcase	Object-Oriented Programming				
Python	python scripting		s3	scm	stl
TCP/IP	Terraform	Visual Studio		VPC	

PROJECTS

AAAI

📅 05/2023 - 01/1970

Analytics Automation Artificial Intelligence project aimed at efficient data serialization.

- Learnt Google Protobuf and generated C++ and Python library files.
- Integrated task synchronization using threads mechanism.
- Handled codebase changes to manage Jam zones and device failures.

Gamut Extension

📅 05/2021 - 09/2022

Gamut Extension project focused on adding a new process color.

- Implemented the pink productization changes and integrated the toner reduction algorithm.
- Delivered project features on time.

SSS2.0

📅 03/2020 - 05/2021

SSS2.0 product development and rollout task.

- Engaged in productizing Fiery DFE on a new codebase.
- Conducted root cause analysis and resolved customer issues.
- Performed verification through testing.
