- Team Leadership
- RE-Framework
- API integration
- Database integration
- UiPath Apps
- Action Center
- Document Understanding
- Communications mining
- Desktop apps integration
- Web Automation / Citrix Automation etc.
- ML model integration

PROJECT SUMMARY

Customer	Role	Duration
A leading company in Ecommerce Industry	Lead Developer	4 years
A leading company in Banking	Developer	8 months
A leading company in health care Industry	Developer	9 months

Project Name: Beyond Plus Membership Cancellation

Developer Tool: UiPath

Application Environment: Windows/Web Application

Role: RPA Developer

Project Description:

Customer requests to cancel the B+ membership or disable the auto renewed membership. RPA Bot will mimic the manual steps like follows.

- BOT will get the input report from Salesforce with customer requests detail.
- BOT will check whether requested order number exists or not in order management portal.
- In My Offer's portal Bot will check beyond plus offers used or not
 - If yes, disable auto renew
 - If not, cancel membership
- BOT will either cancel membership or disable auto renewal in Beyond Plus Membership portal.
- If cancel membership, Bot will appease the 100% amount to customer in order management portal (EOM).
- If Disable Auto Renew, it will renew the membership in Beyond Plus membership portal

RESPONSIBILITIES:

- Analyzed process steps in collaboration with the Business Team.
- Created the PDD & SDD.
- Developed the automation using the RE-Framework.
- Deployed the package to Orchestrator.
- Configured the Robot and Environment.
- Creates Triggers to execute the process at specified times.
