SUMMARY

As a Java developer, I am responsible for designing, developing, testing, and maintaining software applications using the Java programming language. My primary focus is on building scalable, efficient, and reliable software solutions that meet the requirements of our customers.

EXPERIENCE

Intern

Brainstack Technologies

07/2023 - 12/2023 Chennai, Tamil nadu

- Design and Development: Design and develop high-quality software applications using Java, ensuring that they meet the requirements and specifications outlined by the project team.
- Code Review: Review code written by other developers to ensure that it meets coding standards, is bug-free, and is maintainable.
- Testing: Write unit tests, integration tests, and system tests to ensure that the software function.
- Research: Stay up-to-date with the latest developments in the field of Java development, including new libraries, frameworks, and technologies.
- Code Optimization: Optimize code for performance, scalability, and maintainability.

Industrial Trainee

NIIT

01/2024 - 04/2024 india

- This course is designed to introduce students to the basics of Java programming language and its applications. The course will cover the fundamentals of Java syntax, data types, control structures, functions, and object-oriented programming concepts. Students will also learn how to use Java for developing desktop applications, web applications, and mobile applications.
- Java EE (Enterprise Edition): A set of specifications for developing enterprise level web applications.
- SDK (Software Development Kit): A set of tools and libraries for developing Android apps.
- Spring Framework: A popular framework for building enterprise-level web applications.
- Hibernate: A popular ORM (Object-Relational Mapping) tool for interacting with databases.

VOLUNTEERING

Support Volunteer

Vels University

06/2023 - 12/2023

Supported IT needs and educated students.

- A supporter volunteer is a type of volunteer who provides non-technical support to an organization or cause students.
- Administrative tasks: Answering phones, responding to emails, data entry, and other office tasks.

EDUCATION

Bachelor of Computer Science

Vels University

09/2022 - 05/2024 Palavaram, Chennai

Diploma in Computer Engineering

Murugappa Polytechnic College

04/2019 - 11/2022 Avadi, Chennai

KEY ACHIEVEMENTS

Improvement Lead

Led a team that improved company-wide application measures, reducing system vulnerabilities by 30%.

Rapid Threat Response

Recognized for rapid identification and mitigation of a high-risk security threat within hours.

Software Deployment

Played a key role in the deployment of endpoint security solutions across the company.

Project Innovator

Initiated and led a project to implement a new intrusion detection system adopted by the company.

SKILLS

HTML

CSS

Java

Data Structures

Springboot

MYSQL

CI/CD Pipeline

AWS S3

CERTIFICATION

NIIT Stack Route Professional Certificate

A certification demonstrates your expertise and commitment to your profession. The process of preparing for a certification can help you improve your skills and knowledge in Java programming.

Brain Stack Solution Ltd

Completed the concepts of involve building a web application, desktop application.

PASSIONS

Developer

A developer is a professional who designs, builds, tests, and maintains software applications, systems, or tools. Developers are responsible for writing code, debugging, and troubleshooting issues with software applications. They may work on a wide range of software development projects, from mobile apps to operating systems to web applications.

Continuous Learning

Dedicated to continual skill enhancement through certifications and courses.
