WORK EXPERIENCE

Unikul Solutions Pvt Ltd

Software Developer

2023 - Present

- Successfully implemented WhatsApp integration chatbot, enabling end users to access comprehensive information seamlessly, ranging from timetables to feedback. Pioneered the development of menu bar functionality for the admission procedure using Python and Natural Language Processing (NLP) techniques like spacy, deployed on Microsoft Azure.
- Was responsible for creating node.js REST /RESTful APIs on SOAP and Odata webservises in JSON Format.
- Led the creation of a faculty mobile app from scratch using Flutter. Added feedback feature and ensured smooth functionality by writing code in Dart. Also, built the backend part by writing APIs in Node.js for seamless integration.
- Led the deployment of a robust face recognition system using the InsightFace library, leveraging Python proficiency to seamlessly integrate advanced facial recognition capabilities.
