About

Dynamic CSE undergraduate with a strong foundation in software development. Proven track record in competitive achievements and hands-on projects, blending technical expertise with entrepreneurial drive to create impactful solutions.

Education

Thapar Institute Engineering & Technology (TIET Patiala) 2023 - 2027 *B.Tech in Computer Science & Engineering*

Work Experience

Snap Inc. (Santa Monica, USA)

Sept 2024 – Nov 2024

- AR and Software Engineer extern Remote
- Developed two AR lens used by over 100K+ users worldwide on Snapchat, achieving a 98% conversion rate from views to plays.
- Was among one of only 300 candidates across the world selected for the AR/SDE externship.
- Designed, developed, and tested immersive AR experiences by leveraging principles of digital storytelling, incorporating diverse 2D and 3D assets.
- Collaborated with cross-functional teams to enhance AR functionalities, focusing on user engagement and interactivity.

Cube. (California, USA)

Apr 2024 - Jul 2024

- Drove growth for Cube by leveraging cutting-edge AI to enhance restaurant performance, achieving a 25% boost in walk-ins and 80% higher organic visibility. Remote
- Cultivated strategic partnerships and strong client relationships, supporting Cube's mission to innovate and expand market reach.

Projects

AR Lens Development (Snap Inc.)

[Link](#)

- Developed Garment-Transfer and Run Riots Game Lenses, achieving 40K+ and 80K+ plays on launch day, respectively. Integrated 2D/3D assets to create engaging, high-performance AR experiences.
- Utilized a blend of 2D and 3D assets and optimized performance across devices to ensure smooth, immersive experiences, contributing to the lenses' high play rates and user satisfaction.

Train Seat Booking System Using Thread and Deadlock

[Github](#)

Designed a multi-threaded train reservation system with advanced deadlock handling, leveraging OS concepts, threading, and concurrency to enhance efficiency and simulate real-world booking scenarios. Technical Skills

Skills:

Languages: Python, C++, JavaScript

Backend: Node.js, Express.js

Frontend: React, TailwindCSS, HTML, CSS, Bootstrap

Data Structures and Algorithms: Advanced DSA concepts, CP

Developer Tools: Lens Studio, VS Code, GitHub, CUDA

Honours and Awards

AlgoUniversity Technology Fellowship

Oct 2024 – present

- Selected among the top 5% of 20,000+ talented applicants PAN India.

AlgoUniversity Technology Fellow

National Finalist in Startupthon (Top 2 among Thousands of Teams)

- Top 5 among thousands of teams with **VisionV-Soft**, an AI/ML-based eye care solution.
