

CURRICULUM VITAE

Vikas Giridhar
#327, Varshini
Residency, Arehalli
Bengaluru – 560061

Date of Birth 12 Jul 1990
Email vikasgrao2@gmail.com
Contact no : +91-9964464499

PROFESSIONAL SUMMARY:

A seasoned software engineer with 10+ years of experience in designing and developing robust software solutions using C/C++ and Python on Linux platforms. Skilled in Object-Oriented Programming, SDLC processes, and knowledge of AI-based applications. Recognized for driving cross-functional collaborations, delivering high-quality software, and achieving excellence in healthcare technology and multimedia systems.

PROFESSIONAL SYNOPSIS:

- **10+ years of experience** in software design and development using C/C++ and Python on Linux platforms.
- Strong expertise in **Object-Oriented Programming (OOP)** concepts and design principles.
- Hands-on experience with **Python scripting** and libraries like TensorFlow for Artificial Intelligence.
- Proficient in **Advanced Object-Oriented Programming, Multithreading, STLs and Data Structures**.
- Skilled in interacting with clients for **requirement gathering** and managing **escalations**.
- Exposure to multiple phases of SDLC, including **Requirement Analysis, Design, Integration, and Unit Testing**.
- Experienced in both **Waterfall** and **Agile-Scrum** software development methodologies.

KEY ACHIEVEMENTS:

- **Awards & Recognition:**
 - Completed the Young Emerging Professional Program powered by Harvard ManageMentor at Capgemini.
 - Received the Rising Star Award at Capgemini for exceptional performance within six months.
- **Academic & Technical Development:** Completed multiple technical certifications from platforms like Coursera, Pluralsight, and Edureka.
- **Client-Centric Deliveries:** Successfully managed escalations and delivered high-impact projects for global clients across diverse domains.

WORK EXPERIENCE:

Organization: GE HealthCare

Designation: Senior Software Engineer (Nov 2021 – Till Date)

- Transitioned from a consulting role to a full-time employee, with a leadership role in the SVCT project.
- Held ownership of critical sub-systems, driving their integration and functional validation within the CT software ecosystem.
- Designed and implemented technical solutions for complex system requirements, ensuring alignment with project goals.
- Acted as a technical lead, mentoring team members and ensuring code quality through rigorous reviews.
- Collaborated extensively with cross-functional teams, contributing to the enhancement of product quality and timely deliveries.
- Played a pivotal role in tracking, analyzing, and resolving bugs across product modules, ensuring high system reliability.
- Documented technical changes comprehensively, maintaining high-quality deliverables and compliance standards.

Organization: Capgemini Technology Services India Limited

Designation: Consultant (Jan 2020 - Nov 2021)

- Contributed to a healthcare imaging project, integrating various modules into a cohesive application framework.
- Played a critical role in module integration, ensuring seamless communication and functionality across components.
- Actively engaged in bug tracking and resolving issues across interdependent product modules.
- Conducted system dry runs in CT bays, ensuring all components performed as intended under operational conditions.
- Supported requirement translation into actionable tasks and delivered new features adhering to client expectations.
- Documented technical changes and collaborated with cross-functional teams for peer reviews.
- Built a strong foundation for transitioning into a full-time role at GE Healthcare.

Organization: L&T Technology Services

Designation: Consultant (Dec 2017 - Dec 2019)

- Developed a Linux-based application to predict the state of a meter using vibration sensors, designing and implementing application modules from scratch.
- Connected sensor device I/O boards and interfaced them with Modbus registers for seamless communication.
- Integrated Python TensorFlow libraries for AI-based data processing.
- Developed backend for sensor data processing, including alarm and notification handling.

- Collaborated with customers to address change requests and deliver bug fixes.
- Performed testing, defect identification, and compliance verification.
- Added new features for subsequent releases.

Organization: **HCL Technology Pvt Ltd.**

Designation: **Member Technical Staff (Mar 2016 - Dec 2017)**

- Worked on platform and middleware development for Fios IPTV and developed features for AVS Ingest Manager modules.
- Resolved pre-release bugs, managed bug fixes, and conducted root cause analysis (RCA) for customer deployments.
- Interacted with beta customers and delivered new feature development for successive releases.

Organization: **Ittiam Systems Pvt Ltd.**

Designation: **Consultant (May 2014 - Mar 2016)**

- Worked on proprietary multimedia frameworks for encoder and transcoder systems.
- Implemented and tested multimedia encoding and transcoding modules.
- Validated applications on diverse multimedia platforms.

EDUCATION QUALIFICATION:

- **C++ and Core Java Certification:** NIIT, Mysore (2012-2013)
- **B.E. in Electronics and Communication Engineering:** Government Engineering College, Chamarajanagar (2008-2012) – 64.41%
- **Pre-University:** Sri Lakshmi Hayagreeva PU College (2007-2008) – 55.55%
- **SSLC/Metric:** SVEI High School (2005-2006) – 86.88%

SOFTWARE PROFICIENCY:

- **Programming Languages:** C/C++, Python, Shell Scripting, Perl
- **Frameworks and Libraries:** QT5, TensorFlow, STL, Multithreading
- **Repositories:** CVS, GitHub, ClearCase, SVN
- **Bug Trackers:** Jira, ClearQuest, HCL Compass
- **Tools:** Qt Creator, Eclipse, VS Code
- **Operating Systems:** Linux, Windows
