EXPERIENCE

Lead MTS

Siemens EDA

Sep 2024 – Jan 2025

Catapult

- Develop and maintain the front end of Catapult (High Level synthesis tool)

Senior Engineer

Qualcomm

Jan 2020 – Aug 2024

Test Base Station (TBS) Organization

- Specialized in high-performance C/C++ networking in Linux for data plane functional/performance testing in 5G cellular networks.

Automated Test Framework Design for 5G Core Network

- Designed and developed an automated test framework for the 5G Core Network, encompassing various functionalities and interfaces.
- Foundation for executing end-to-end tests, functional tests, and performance tests, ensuring comprehensive validation.

Technical Leadership and Project Management

- Led a team of four in scoping, designing, and implementing a feature under the 3GPP umbrella for the TBS project.
- Managed the delivery of the feature, with an estimated 5000+ lines of code, to the relevant Point of Contact (POC) within given deadlines.

Contributions to Wireless Technologies

- Made multiple contributions to cutting-edge wireless technologies, including DPDK, IPv6 multihoming, Reflective QoS, and PDU Session splits.
- Contributions directly influenced TBS's goal of achieving data rates 100 times faster than LTE.

C++ Developer

Secfence

Aug 2019 - Dec 2019

- Planned and designed effective offensive security strategies in collaboration with the Lead, focusing on proactive measures to enhance system defenses and mitigate vulnerabilities. The exploit developed leveraged kernel device driver vulnerabilities.
- Developed multiple C# modules to bolster cybersecurity capabilities, providing support for targeted cyber attacks aimed at identifying and addressing existing vulnerabilities within the scope of a specific Common Vulnerabilities and Exposures (CVE).

C#

CVE

INTERNSHIP

System Software Intern

Nvidia

Aug 2018 – May 2019

- Client side development of the app where the game is streamed on the cloud to the server and receive the video stream coming from the server. Found a bug in google's android OS while working on this task, where the gaming controllers would not show any haptic feedback while connected to an android device.
- Collected detailed data for battery estimation on various android devices and use Google battery historian script to analyze the power drainage for Nvidia GeForce app.

SKILLS

Programming Languages

- C
- C++
- Python

Technical Knowledge

- Data Structures
- Algorithm
- OOPS
- Linux

EDUCATION

M.Tech. in Computer Science

National Institute of Technology Allahabad

July 2017 - June 2019

B.Tech. in Computer Science

Delhi University

July 2013 – June 2017
