SUMMARY

- Over 10 years of experience in Manual and Automation testing with at least 8 years of manual testing and 2 years of Selenium with Python experience including writing automation scripts, test execution, debugging, and defect management and running in Jenkins.
- Experience in Requirements gathering, Requirements analysis, Test planning, testing, defect tracking, documentation of various phases of a project (Ex: traceability matrix) and end to testing.
- Experience with Sanity Testing, Black Box Testing, Functional Testing, Smoke Testing, Performance Testing, Cross Browser Testing (Browser Stack), Load Balance Testing, Regression Testing.
- Strong experience with Agile software development environments.
- Worked in Automation testing used selenium hybrid framework using excel sheet.
- Ability to analyze user stories and create test scenarios, test plans, and test cases.
- An expert in the analysis of defect root causes and defect tracking with Bugzilla and JIRA
- Having experience in performance testing using JMeter as well as using JIRA, SQUASH, Confluence, and RabbitMQ.
- Hard working, commitment, results-oriented, and eager to learn new technologies with good interpersonal skills.
- Experienced in SQL and make changes to DB base on the requirement. Also experienced in data testing after data migration.
- Experienced in verifying database and UI testing in migration time and verify the database productivity and workflow flow, and file movement system.
- Performed Integration testing by verifying integration to via tool integration and with file validation.
- Having knowledge in automation with JAVA(OOPS concept) and experience in selenium with Python.
- Good interpersonal skills, committed and results oriented, hardworking, eager to learn new technologies, and willing to take responsibility for testing all new features introduced on new releases.

SKILLS

Manual testing		Functional Testing		Agile Methodology		Jira	Jenkins	Performance Testing	
JMeter	Kaizen	Java	Automation	Hybrid framework		selenium		Bugzilla	SQL
Database Testing		Integration Testing		Python					

EXPERIENCE

06/2017 - 07/2022

Chennai

Senior Software Engineer – Testing

TNQ Technologies : Nimble

Nimble is an end-to-end enterprise workflow solution for publishing process management. Developed based on the strong fundamentals and standards of Business Process Modeling Notation (BPMN), Nimble can handle any possible scenarios in a workflow.

- Analyzing the requirements and understanding the behavior of the application using story tickets.
- Having good knowledge regarding Agile methodology and Java concepts. Working with tools such as JIRA for managing test cases.
- Involved in regression testing as well as functional, nonfunctional testing and Live testing.
- Having experience in executing manual and automated cases from Jenkins.
- Uploading the test cases into Test Plan Module, reporting the defects, tracking defect and report it using Bugzilla and JIRA.
- Experience in preparing testing documents like requirement Traceability Matrix (RTM) and Test closure report
- Preparing Impact Analysis, L0, L1 and Effort Estimation for the team.
- Automated regression and sanity test case using hybrid framework by calling methods.
- Having experience in automation with JAVA(OOPS concept) and selenium, also having knowledge in Python.
- Expert in capturing locators using XPATH
- Manage a team of technicians in their daily duties.

05/2013 - 05/2017

Chennai

Software Test Engineer

TNQ Technologies : PageCentral

- Creating test plan and test case for Story tickets.
- Ensure that automation scripts are running successfully.
- Analyzing the test results and updating the test scripts
- Involved in Spot testing, regression testing
- Giving mandatory information of a defect to developers in order to fix it.
- Involved in Functional Testing and raising test defects using Bugzilla
- Also performed database and UI testing in migration time and verify the database productivity and workflow flow, and file movement system and Integration testing

02/2012 - 04/2013

Chennai

Software Test Engineer

TNQ Technologies : Pagation

- Hands-on experience in preparing test cases and executing them. Extensive experience in analyzing user stories and acceptance criteria and developing test scenarios as well as cases.
- Create test cases using Squash test management tool.
- Involved in team meetings for requirement analysis
- Creation of Test Scenarios, Test Cases and Test Data.
- Involved in regression testing as well as functional, nonfunctional testing and Live testing.

EDUCATION

2007

B.E (Computer Science Engineering)

Thiruvalluvar College of Engineering, Vandavasi

2004

Diploma in Computer Technology

GMS MAVMM polytechnic college, Madurai

LANGUAGES

Tamil Native

English Advanced
